

Never stop learning, because life never stops teaching.....

Dear Parents and Students,

I am truly looking forward to starting the new school year in the fall - and in order to hit the ground running, I am asking all honors math students to keep their current math knowledge 'fresh' over the summer.

In order to accomplish a review of material learned during this school year, students will once again have a summer assignment similar to last years' summer work. This will help answer at least one question that I know is 'hanging' out there, YES!!! - Students can still continue to use and earn new bonus slips that are worth $\frac{1}{2}$ point each. These bonus slips can be used as added extra credit to a chapter test during the school year whenever needed. So students – Please! - don't throw out those slips!!!!

Over the summer, students will once again be able to earn a possible total of 10 bonus slips by completing an average of 15 minutes a day, or an hour and a half a week, over the course of 10 weeks. Each grade has choices of websites and activities listed below – students should vary their choice of topics from the list, appropriate for their incoming grade level. Students should ask their parents to sign on the chart found on the last page that the work was completed.

This fall will be exciting for both the students and myself – I know that our mutual enjoyment of mathematics will be exchanged and shared in different ways in my classroom – and that we will all learn something new – each and every day.... After all, Learning is a life-long process!

See you in the fall,

Mrs. DiPrinzio
