The various powers that rule the financial, political and social venues of Israel have their buildings marked off by sacred geometry that is mathematically in correspondence to the Dome of the Spirits. There are various pentagrams, triangles or pyramids configured that are lined-up from the Temple Mount and the surrounding City of Jerusalem. The overall pattern corresponding to the ORION constellation and the Giza Pyramids. These same patterns and numerical values appear to be constants with a particular spiritual, occultic and/or esoteric meaning behind such fixed points, geometrically. This is not to infer that the Holy Temple of YHWH is associated with these Luciferian ley-lines that were subsequently added as the city has grown from outside the Old City limits but that such entities have sought to usurp the energies and power of such a divine and holy geometry that is divinely ordered and laid out. These same principles and associations are seen in many world capitals such as London where the ley-lines are tied to the Royal Palaces and the Bank of England. The Bank of England's main building is actually a special pyramid of 'time' based on GPS latitude readings. This same principle is found here in Jerusalem with the City Tower that in actuality is a microcosmic of a time-machine or 'clock' when distanced from the Dome of the Spirits. The City Tower corresponds to the Silver Gate just above the constellation ORION in the heavens. It is interesting that the City Tower itself is gray or silver-ish in color; it dominates the Jerusalem skyline. The 'Masters' of the Pyramids seek to harness the energies of such ley-lines to help them dominate all aspects of the political, social, religious and judicial monopoly of power in the world as according to the Bible, Jerusalem is the geographic center of the World.
