

## I. Organisms.

- A. I can name and give examples of both single- and multi-celled organisms.
- B. I can explain the processes of both asexual and sexual reproduction. I can also give examples of organisms that reproduce these ways.

## II. Cells

- A. I can define “cell” and can also describe the function of four basic parts of a cell.

## III. Genetics at the Cellular Level--Chromosomes

- A. I can describe how chromosomes are inherited from parents. I can also explain what happens to chromosomes as organisms grow and develop.
- 

## IV. Punnett Square

- A. I can fill out and “read” a Punnett Square.

## V. Changing Traits

- A. I can name and define accidental changes to an organism’s traits.
