Windows Update History

Here's a handy site to bookmark if you're a Windows user. With the regular automatic updates to Windows 10, sometimes it's hard to know what version of Windows is the latest.

There's a site where Microsoft lists all of their recent updates and the date they were released.

You'll also find information about bugs and help links if you're having issues with that update.

Updates for Windows 10, version 1809

On the left side of this page, you'll find a list of all the updates released for this version of Windows. You can see any known issues. Installing the most recent update ensures that you also get any previous updates you might have missed.

If you have questions or need help activating or troubleshooting Windows, see our help topics below:

- For information about how to update, see Update Windows 10.
- If you have questions about manually installing or removing an update, see Windows Update: FAQ.
- If you need to activate Windows, see Activation in Windows 10. If you're having trouble with activation...

Especially handy is the list of known bugs and the fixes for them.

<thead>
<tr>
<th>Operating System</th>
<th>Issues Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows 10, version 1809</td>
<td>Microsoft has identified issues with certain new Intel display drivers. Intel inadvertently released versions of its display driver (versions 24.20.100.6344, 24.20.100.6345) to OEMs that accidentally turned on unsupported features in Windows.</td>
</tr>
<tr>
<td>Windows Server 2019</td>
<td>After updating to Windows 10, version 1809, audio playback from a monitor or television connected to a PC via HDMI, USB-C, or a DisplayPort may not function correctly on devices with these drivers.</td>
</tr>
<tr>
<td>Windows Server, version 1809</td>
<td><strong>Next Steps:</strong> Intel has released updated drivers to OEM device manufacturers. OEMs need to make the updated driver available via Windows Update.</td>
