

TRCC

TEXAS REGIONAL CTSA CONSORTIUM

*UT Health Houston &
MD Anderson Cancer Center*

*UT Southwestern
Medical Center*

*UT Health
San Antonio*

UTMBHealth

OUR MISSION

The Texas Regional CTSA Consortium (TRCC) is a regional consortium of the national Clinical and Translational Science Award program. TRCC is a collaborative research network which advances innovative practices in translational science across Texas for the improvement of human health.

OUR GOAL

The goal of the TRCC is to facilitate clinical and translational research and dissemination among the Texas CTSA hubs and other interested Texas and national biomedical research institutions.

OUR MEMBERS

The founding Texas CTSA award institutions include **UT Health and UT MD Anderson** in Houston, **UT Southwestern Medical Center** in Dallas, **UT Health Science Center** in San Antonio and **UT Medical Branch** in Galveston.

OUR STRATEGIC MODEL

Collaborate, Encourage, Foster, Advance, Support

- ✓ Work with the people of Texas to determine health priorities, foster community involvement, trust and participation in research, and implement best practices that improve health.
- ✓ Encourage, support, conduct, and evaluate clinical and translational research across the state of Texas and nationally.
- ✓ Actively support the strategic goals of the National Consortium.
- ✓ Foster the efforts of key function consortia within the TRCC and disseminate the methods for the development and implementation of their best practices to both CTSA and non-CTSA institutions.
- ✓ Advance and improve education to enhance the clinical and translational research workforce through statewide and national collaborations.

OUR INITIATIVES

- ✓ Clinical Trials Xpress
- ✓ Statewide Proteomics Initiative
- ✓ TRCC Biobank Initiative
- ✓ Core Laboratory Sharing
- ✓ Entrepreneurship Program
- ✓ TRCC Informatics Initiative
