

Roofing That Lasts!

THE SMART CHOICE

Quality 40 Year Warranted . Great Customer Service

Standing Seam Metal Roofing

Vertical Seam

With 1-3/4" high ribs, Vertical Seam Metal Roofing has the strength needed to be installed over either open framing or solid decking. This standing seam system is fastened using hidden clips. These clips allow for greater expansion and contraction of the panels, at the same time ensuring wind resistance. Vertical Seam is Miami-Dade county approved, meeting some of the most stringent requirements for high wind areas. Vertical Seam comes standard with striations to eliminate oil canning.

These Standing Seam Roof panels, deliver a clean, linear elegance paired with unmatched quality and unrestricted thermal movement for a dependable, long-lasting and beautiful roof.
