Skunk Craft with Toilet Paper Roll:

Supplies needed:

Toilet paper roll
Black and white paper
Glue
Googly eyes
Crayons
Scissors

Instructions:

Cut the black paper to the size of the toilet paper roll or color the toilet paper roll black

Wrap the black paper around the toilet paper and glue it in the back.

Cut a long strip of the black paper and a long strip of white paper – the white paper should be half the width of the black paper. Glue the white strip in the center of the black paper. This is the back and tail.

Glue googly eyes to the front, around half-way down. If you don't have googly eyes, draw 2 eyes.

Draw a nose and mouth under the eyes.

Gently push down the top of the toilet paper roll in the center to create two ears.

Glue the top of the black and white strip of paper between the ears and down the back.

Glue a small strip of white paper to the stomach

Now you have a skunk!
