

The CellBase kit includes an AC/DC wall adapter power supply and a 12V external battery cable. The AC/DC wall adapter power supply is intended for indoor applications only. For outdoor applications, the 12V external battery cable should be used to connect a 12V, 75 AH, SLA battery to the CellBase. (UB12750, available from Buckeye CAM).

The connections should be as shown below. An optional 12V solar panel (sold separately) may be used. Buckeye Cam part number 997-0014 (or equivalent) is recommended.
