

## **Water Rescue Awareness**

**Our Water Rescue Awareness course is built around a basic fact, 80% of all successful water rescues are shore based. This means that the other 20% includes boat access, helo access and someone actually going in the water to rescue the victim.**

**Water Rescue Awareness teaches to stay out of the water and use the training received to make the best possible decision to assist the victim. It also teaches when a more advanced skill set is required for a safe and successful rescue.**

**This course can be completed in roughly 3 hours. We are usually able to teach this course within the time restraints of a fire dept. meeting night or SAR team meeting schedule. We've taught this during seminars and church group meetings. It's our goal to get this info out to all of those who may be called to assist someone in need near or in the water.**

**Hare Mountain Rescue provides all of the equipment needed for the course. We will also assist with equipment purchases and do a safety check on any water rescue equipment you may have.**

**For additional course information, course cost based on the number of students and additional fees please fill out the Contact Us form on our website.**
