

Day 5 Homework

1. Why is night driving more dangerous than daytime driving?
2. At night, how can you reduce the problem of glare from the headlights of oncoming vehicles?
3. When driving through heavy daytime fog, should you drive with your headlights on high beam?
4. True or false: In the winter time, it is okay to leave frost on your windshield and windows during short trips.
5. What must you do to reduce the chances of hydroplaning when roads are wet?
