

# Summit Engineers, Inc.

## PROFESSIONAL REGISTRATIONS

Virginia

Maryland

The District of Columbia

Delaware

Pennsylvania

## PROFESSIONAL AFFILIATIONS

ASHRAE, American Society of Heating, Refrigerating and Air-conditioning Engineers, Inc.

## EDUCATION

BSME, Mechanical Engineering, 1981, Cornell University, Ithaca, New York

## INSTRUCTOR

AIA prep course on Mechanical Systems, University of Maryland

**Kenneth B. Cantwell, P.E.**

**President**

*Chief Mechanical Engineer*

## Professional Experience

As Chief Mechanical Engineer, Ken brings over 30 years of experience to Summit Engineers Inc. Ken has worked on a variety of existing building renovations and new building designs including computer centers, senior living facilities, health care facilities, multi-family and mixed-use buildings, institutions, recreational facilities, museums, laboratories, retail and office spaces. During the design and engineering of each project type, Ken is able to draw from this base to provide creative solutions to each new engineering challenge.

Ken believes the key to Summit's success is to understand each client's need and design objectives at the onset of the project. By continuing to evaluate proposed solutions throughout the project, we assure that our final product is well engineered and tailored to each specific client. By striving to understand our clients needs and act on this information, we build better client relationships and better projects.

## AREAS OF PROFESSIONAL COMPETENCE

Mechanical Engineering Design

Project Management

Energy Analysis

Control Systems Design

Indoor Air Quality Analysis

Facility Evaluations

Construction Administration
