

Fall Preparation for the treatment of Winter Exclusive Beekeeper Anxiety Disorder (WEBAD)

How is your windbreak?

Are Your Hives Level?

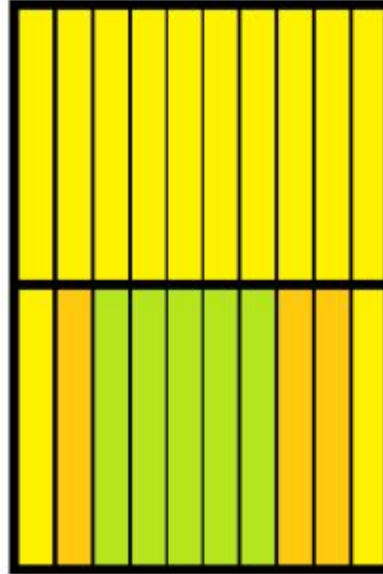

This is a Full Inspection Breakdown

- Honey stores
- Pollen stores
- Queenright
- Brood Pattern
- Parasite Pressure

What we want to Find

Fall in to Winter Set Up

Honey
Pollen
Brood Nest

Now What?

Reassemble and Supplies

- Feeder
- 2-1 Syrup
- Entrance Reducer
- Unscented Swiffer Pads
- Oxalic or Apivar

What I'm not going to do.

- Put the hive back together out of order
- Treat with Apiguard (Thymol)
- Spill Syrup
- Use feeding stimulants
- Keep Inspecting if robbing starts
- Leave a weak hive behind

What do I need to be prepared to do.

- Take Losses (how to take losses, combined, redistribute resources, put empty frames into storage)
- Throw out old syrup
- Set feeding schedule to reach weight goals
