DESCRIPTION: Brand new TD recurve. Great looking. Comfortable pistol grip. Has bushings for rest, quiver and stabilizer. Comes with a brand new string. The reason this bow is being so heavily discounted is because there is a barely visible hairline crack that runs a couple of inches along the grip up to and across the arrow shelf (see pics on last page). This bow was made in China; we bought one to test to see if we wanted to buy more as a Morrison Archery LLC branded bow. You can find other similar bows online under different brand names.
