# Versatech 600

Low-profile bed

**ROTEC**  
INTERNATIONAL  
ADJUSTABLE BEDS

*Brilliantly designed*

# The Versatech difference

Extremely reliable, mobile and flexible, the Versatech was designed to ensure the utmost in safety for both patients and medical staff. With its ability to be lowered to **8 in.** from the floor, with a **600 lb.** total load capacity and a broad range of features, the Versatech bed is nothing short of brilliantly designed!

- 
- Can be lowered to **8 in.** from the floor, thus minimizing the risk of falls and simplifying the application of restraint protocols.
  - Sturdy and reliable, with a load capacity of **600 lb.** (Also available with a load capacity of **1100 lb.**)
  - **Fixed frame** provides greater stability, thus eliminating back-and-forth movements of the wheel base.
  - **Ball bearing** mechanisms ensure smooth transitions and effortless maneuverability in every position.
  - A set of **5 in. double** casters provide superior ease of maneuverability.
  - Integrated expandable frame, allows mattress deck to be extended **without using any tools** from 80 in. to 84 in. to 88 in.
  - A **patent pending** lift system enables heavy loads to be lifted from a **very low height**.
  - A four caster **central braking system** allows bed height adjustments even when the casters are locked.
  - **Elevated side rails** equipped with ergonomic handles provide additional safety even when using thicker care mattresses.
  - Frame integrated receptacle for the trapeze bar.
  - **Integrated scale** option does not affect the 8 in. low-profile feature.
  - Unique design provides a **clearance of 6 in. x 42 in.** (low-profile bed), thereby allowing wheeled equipments to be positioned underneath the bed.

Basic bed ready to be customized with your choice of options.
