

Smoke Outlook for 11/03 - 11/03
San Francisco Bay Area Kincade Fire
 Issued at: 2019-11-03 05:06 PST

Special Statement

This will be the last Smoke Outlook posted for the Kincade Fire forecast area.

Fire

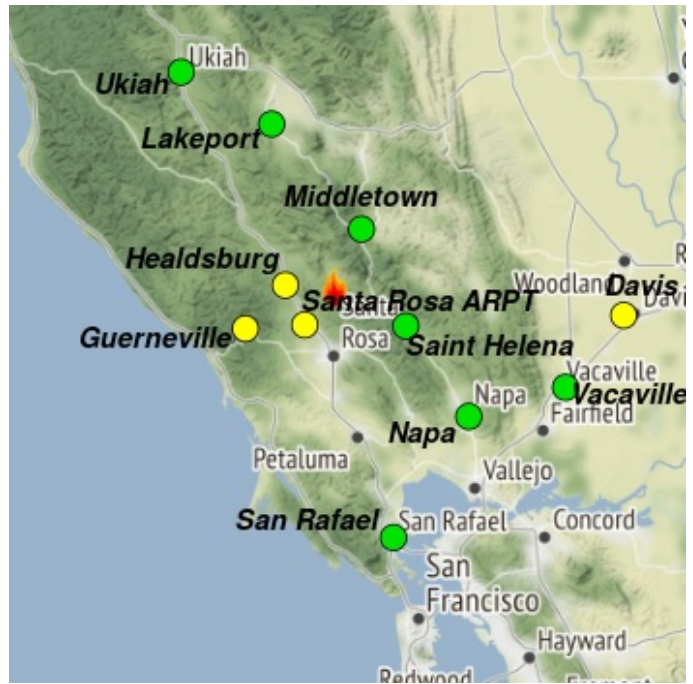

Fire personnel continue to aggressively mop-up hot spots and strengthen containment lines. Very little activity and smoke output was observed on the fire yesterday. As a result, no additional growth has been reported. The fire is currently 77,758 Acres and 75% contained.

Smoke

A dominating high pressure system and strong nighttime inversions will continue to trap smoke in valleys near the fire area. Overall Good to Moderate AQ will persist in Healdsburg, Guerneville, and Santa Rosa. The Sacramento Valley will have Moderate AQ today. The North Bay should have Good AQ throughout most of the day. Any decline of AQ in these areas may be a result of other fire sources.

Other

Denser smoke for short periods can aggravate symptoms for sensitive persons without changing overall 24 hour AQI levels. Note: AQ forecasts below reflect only particulate matter-not ozone.

Daily AQI Forecast* for Nov 03, 2019

Station	Yesterday			Sat 11/02	Forecast* Comment for Today -- Sun, Nov 03	Sun	Sun
	hourly					11/03	11/03
