

e-panel™

# DOES YOUR SIGN OR GRAPHIC DISPLAY PROJECT REQUIRE DIBOND® OR NEW e-panel™?

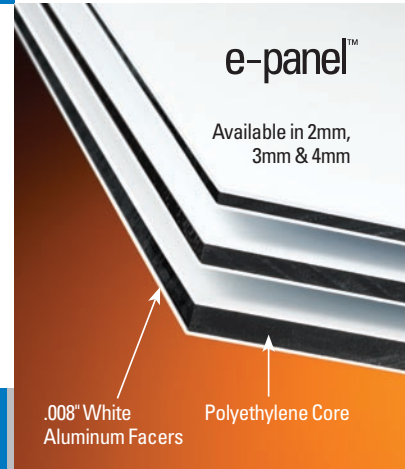

## Selection of materials is critical to any sign or graphic display project.

- Is the graphic being mounted or direct printed?
- What is the shape of the project being fabricated?
- How is the shape to be cut and possibly curved?

## Now you have a choice with Alcan Composites providing two ACM products for your projects.

Dibond® – .012" sheets of aluminum with a solid polyethylene core.  
Suited for both flat sheet and route and return projects.

e-panel™ – **NEW** – .008" sheets of aluminum with a solid polyethylene core.  
Suited for flat sheet applications.

### Dibond® – The Ultimate Substrate

### e-panel™
