

Fred's Kids Newsletter

July 2024

The 2nd quarter of 2024 has been extremely hard on Marindi Grace Academy. The number of students who pay to attend MGA has dropped to the lowest level in many years. This has an effect on everything at the school. Feeding the students is always at the top of the list. The Kenyan Government had the students report late to their schools. The students who would normally be in high school were at Marindi longer which made the need for food even greater than it would have been.

The teachers have been very good about staying at the school even though their pay is sometimes delayed. With the support from our donors, we were able to pay the teachers money due them in June. We thank God for these teachers who care so much for the students

Our young ones take naps everyday and the mats that they slept on were old and ragged. We replaced the old mats with new thicker mats. The ones that had to lay on the hard floors were very appreciative.

The mission of spreading the Gospel never slows down. This is another example of what the Lord is doing in Kenya. The young people are being trained every week and the Churches are constantly having Outreach events.

We thank you for your continued support. You are changing lives now and for eternity.
