* Window Type Bows

Fleetwood Fibre-Glas Bows are supplied with Type "B" Dacron Bowstrings with Nylon Servings.

Here are finest-quality solid fibre-glas bows on the market. They have been tested in a 600 hour salt spray test, have withstood 300 hours in a Weatherometer and have survived gruelling tests of stress and flexibility. *The beautiful high-gloss finish is chip-proof, stain-proof, and moisture-proof.*

All Fleetwood Fibre-Glas Bows are beautifully finished in *Epoxy*.

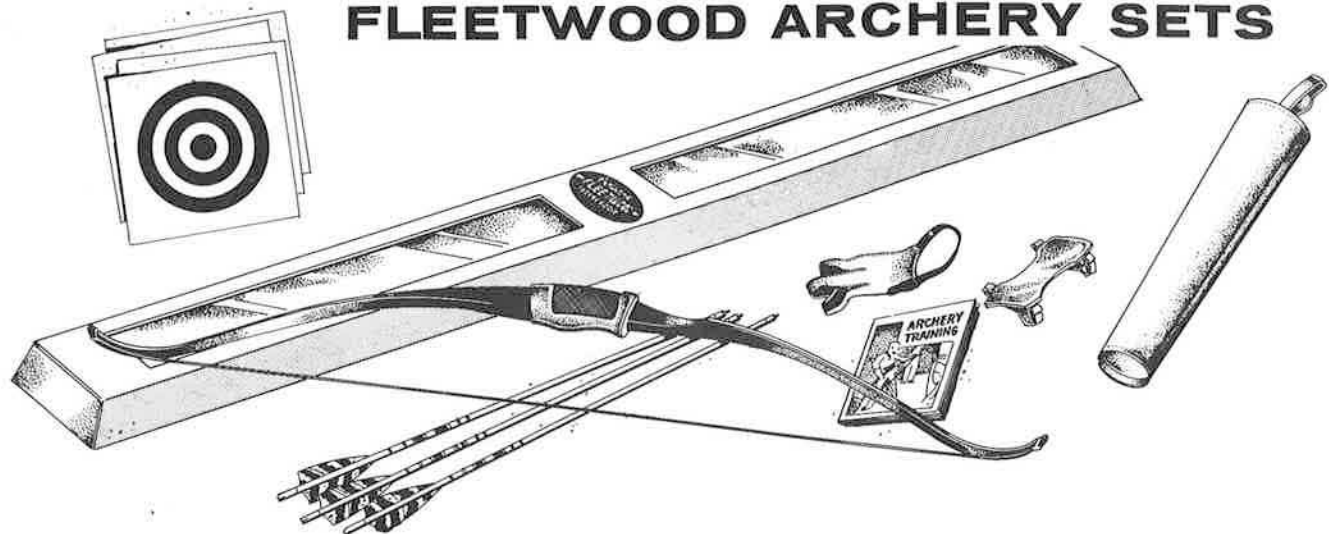

WINDOW TYPE BOW VINYL HANDLE . . . provides sure grip and ample space for arrow rest for center shot.

FOR RIGHT OR LEFT HAND SHOOTERS

All bows are hand nocked to insure proper string alignment.

EASTON ALUMINUM SHAFTS and ARROWS

SWIFT SHAFT FEATURES — Every Shaft:

- Swaged to a point and spiral ground for 11½° full diameter nock taper.
- Identified with trade name and shaft size.
- Includes a precision one piece, long shank case hardened nickel plated steel target point or aluminum broadhead adapter insert.
- Has a bright, clean, burnished surface.
- "Spinner" straight —needs no further straightening.

The SWIFT Shaft will make a perfect arrow for the beginning archer, a good practice and utility arrow for the expert, and a successful and economical arrow for the serious hunter.

When ordering aluminum arrows be sure to specify type of point, arrow length and bow weight. Selection of arrows will be governed by Easton's selection chart. (Right)

MICRO-FLITE SHAFTS AND ARROWS

Micro-Flite shafts are made absolutely straight and since fiberglass is impervious to the elements and unbelievably resilient to the forces of head-on impact, they stay straight. They will not corrode, become misshapen from any cause, or crystallize and, through years of usage, will maintain all their original qualities. Critically controlled production methods provide such absolute uniformity that every shaft is the twin of every other shaft in its production run. ■ Micro-Flite shafts are made in eleven different diameters and weights starting with a Size O, which has an outside diameter of .250 inches, and increasing in increments of .010 inches up to a Size 12 shaft which measures .363 inches. See charts below.
