# BLUETOOTH for new 2023 BC Roasters:

The 2023 and some late 2022 (models with a MFG date of 6.22 and after should have this new data logger) BC Roasters use a new data logger that allows the use of Bluetooth connectivity with ARTISAN Software. You no longer need a BT DONGLE with these models when using newer type PC's & Macs.

1. You will need to download a new driver for your computer as follows: Go to HTTP://WWW.WCH-IC.COM/DOWNLOADS/CH341SER_ZIP.HTML
And download the driver for your model of computer. (Artisan only works on computers not on phones or tablets)

2. Here is a picture setup when installing the driver on a MAC:
