

# Family Based Providers

Timeck, Inc believes that the elderly, physically disabled, and intellectually or developmentally disabled are better served in a family like setting, rather than an institutional setting. We are able to realize this through a network of Family Based Providers and services to individuals in our care.

## What is a Family Based Provider?

A Family Based Provider opens their home and provides care for elderly, physically disabled, and/or intellectually and developmentally disabled individuals. Family Based Providers provide housing, supervision, support and personal care to one or more clients in their care. Support may include assistance with daily living activities, such as bathing, toileting, ambulation, dressing, personal hygiene, eating and meal preparation, attending medical appointments, medication administration, community outings and recreation.

## Support & Compensation

To ensure success in this contract position, we offer substantial support, including introductory and on-going training and access to a Service Coordinator who is on call and available 24 hours a day, 7 days a week when assistance, direction, and advocacy are needed. Should there be a need for it, housing modifications for wheelchair and walker accessibility can possibly be supplied. Family Based Providers receive generous non-taxable compensation, including a room and board stipend.

## Qualifications

If you have a heart for helping others, this is the opportunity for you. While experience is not required, those with caregiving experience whether in a paid or unpaid position, are preferred. Family Based Providers can be male or female and be single or have a family with or without children. Candidates should be age 21 or above.

Reference checks, extensive background check, and drug screening are required.

## Learn More

For more information on this challenging yet exceptionally rewarding opportunity, please contact Iruka Mirian Aruh, RN @ 615-873-1013 or [iaruh@timeckinc.com](mailto:iaruh@timeckinc.com)
