

# Malambo

## Forage Diploid Perennial Ryegrass

**Malambo**, diploid perennial ryegrass is a late maturing variety developed in Europe. It has excellent dry matter yields and an excellent rate of regrowth after grazing. **Malambo's** combination of persistence, resistance to rust and helminthosporium and excellent winterhardiness make it an excellent choice for grazing in areas suitable to perennial ryegrass or in pasture mixtures.

### APPLICATION

- Excellent component for pasture mixes
- Good choice for grazing in areas of perennial ryegrass adaptation, especially where high quality forage is needed.

### MANAGEMENT

- Planting Rate (pure stand): 25—30 pounds per acre
- Planting Rate (mixtures): 5—10 pounds per acre
- Planting Depth: 1/4—1/2 inch

### FEATURES

- Fine, dense leaves
- Excellent seedling vigor
- Endophyte free
- High quality

### BENEFITS

- Excellent for grazing
- Rapid ground cover to reduce weed competition
- Improved animal performance
- Improved animal production
