

## Get The Levels You Need With Our Turn-key Laser Level System!

Tighe Industrial uses a high performance laser transmitter that accurately measures level, distance and position over long ranges in extreme environments. The sensor features advanced timing and sophisticated signal processing for pinpoint accuracy up to 330 ft. for level applications.

We develop and design the controls and touch screen to meet your needs. The controls can be expanded to multiple units with Level & Pounds Remaining. The Silo Laser Level System also has the option of using a wireless transmitter & receiver to get the signal from the top of the silo to the control panel. Multiple communication protocols are available.

Get the levels you need with this simple Silo Laser Level System!

Simplify with Tighe.
