## Allergen information

In recent years there has been a big change to the information that food businesses must give to their customers.

Allergic reactions can make people very ill and can even cause death.

There is no cure to a food allergy, the only way to prevent illness is to make sure food containing the allergen, is not eaten.

The EU law has listed 14 allergens that need to be identified if they are used in a dish.

All food businesses now need to provide information about the allergenic ingredients used in foods sold, or provided by them.

**Unfortunately we CANNOT guarantee that any product/ menu is free from an allergen. We will however, always try our utmost to accommodate any customer who may have an allergy.**

**Should you have a guest/ delegate that has an allergy; please inform us upon ordering so we can deal with the request accordingly.**

It is the **responsibility** of the **customer** ordering the food, to inform us of any requirements and we advise that you obtain this information when organising your lunches.

We are more than happy to help with any queries you may have, so please call if you require any assistance,
