

Properties of Energy “I Can Statements” Outline (1/21)

I. Energy

- A. I can define energy (two parts) and can name the units used to measure energy.

- B. I can name the two broad types of energy. I can also name and explain four or five different types of energy within each broad category.

- C. I can state the Law of Conservation of Energy. I can also illustrate this law with a variety of examples.

- D. I can create Energy Transfer Flow Charts for various toys and situations. I can explain how one energy changes into a different form.
