LET'S WARM UP!

Open your sketchbook!

Start by holding your pencil in your hand and rotating your wrist 10 times each direction!

Now let's hold out our arm and rotate from the shoulder - count to ten!

Last week we started to work on drawing realistic animals. This week we will revisit our technique of lines, shapes, value, scale and texture and create **ONE MORE ANIMAL** from the Chinese Calendar!

THEN....we will use a mirror and draw our FINAL
SELF PORTRAIT

Mexican Artist Frida Kahlo was famous for her many self portraits.

Start with...

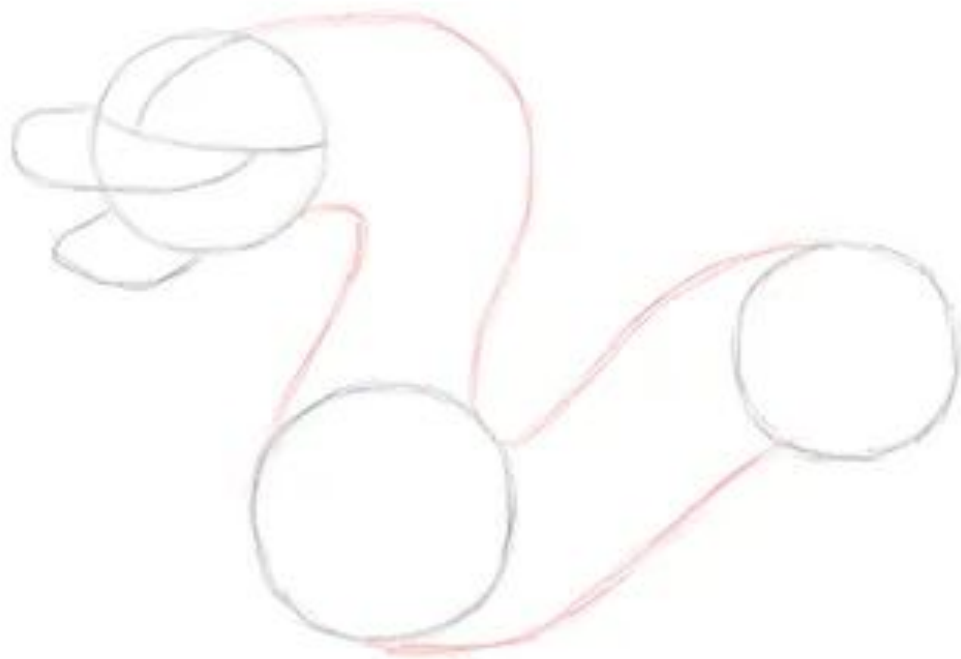

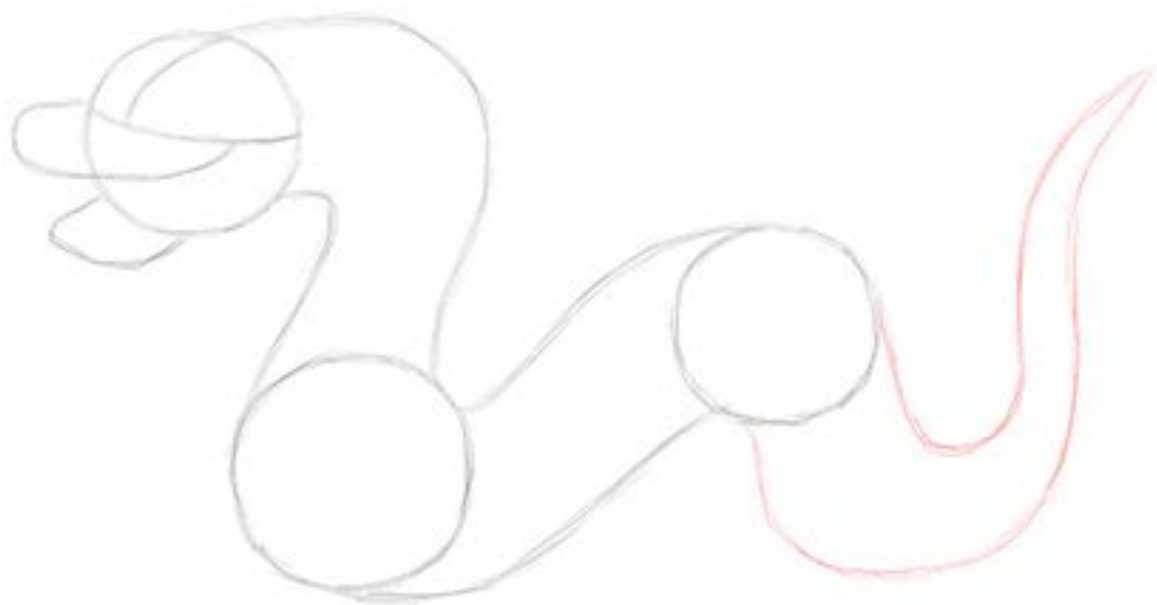

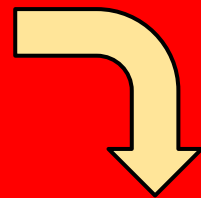

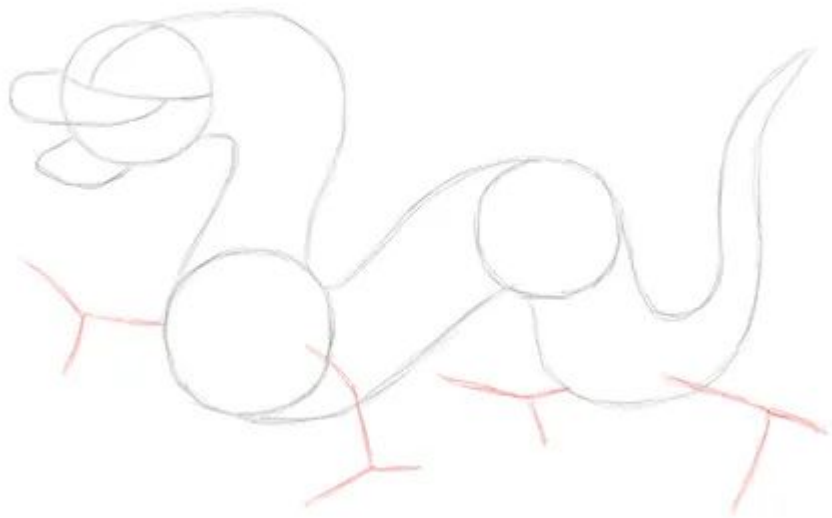

Step 3

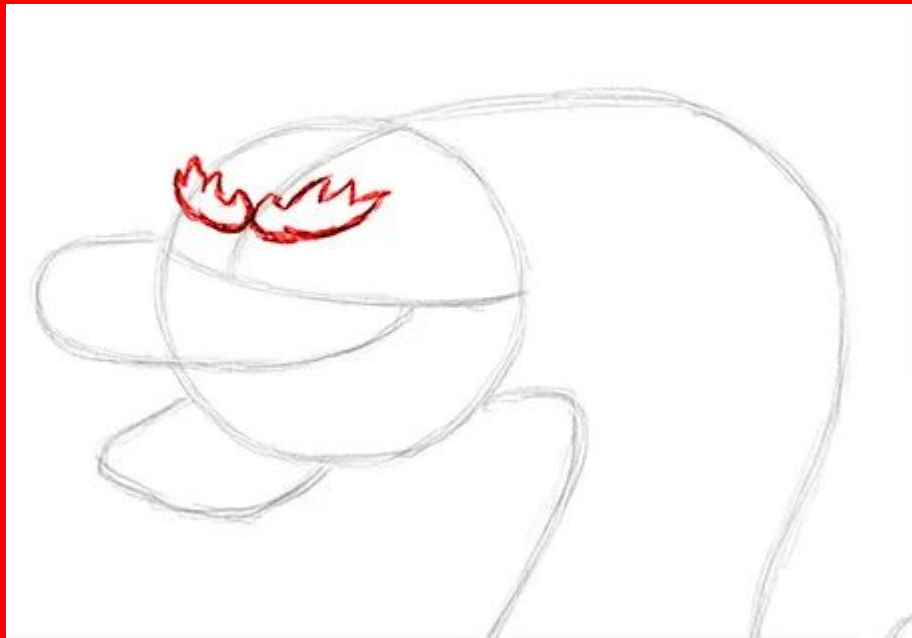

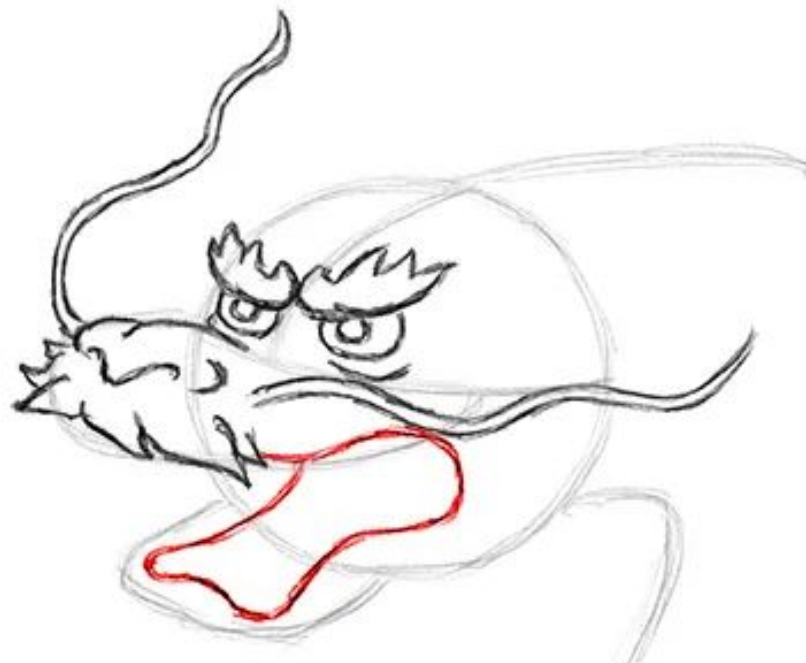

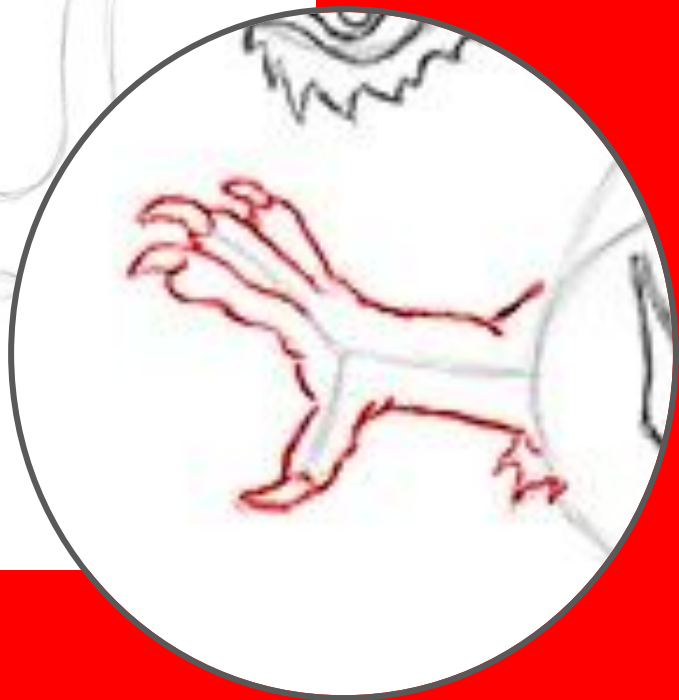

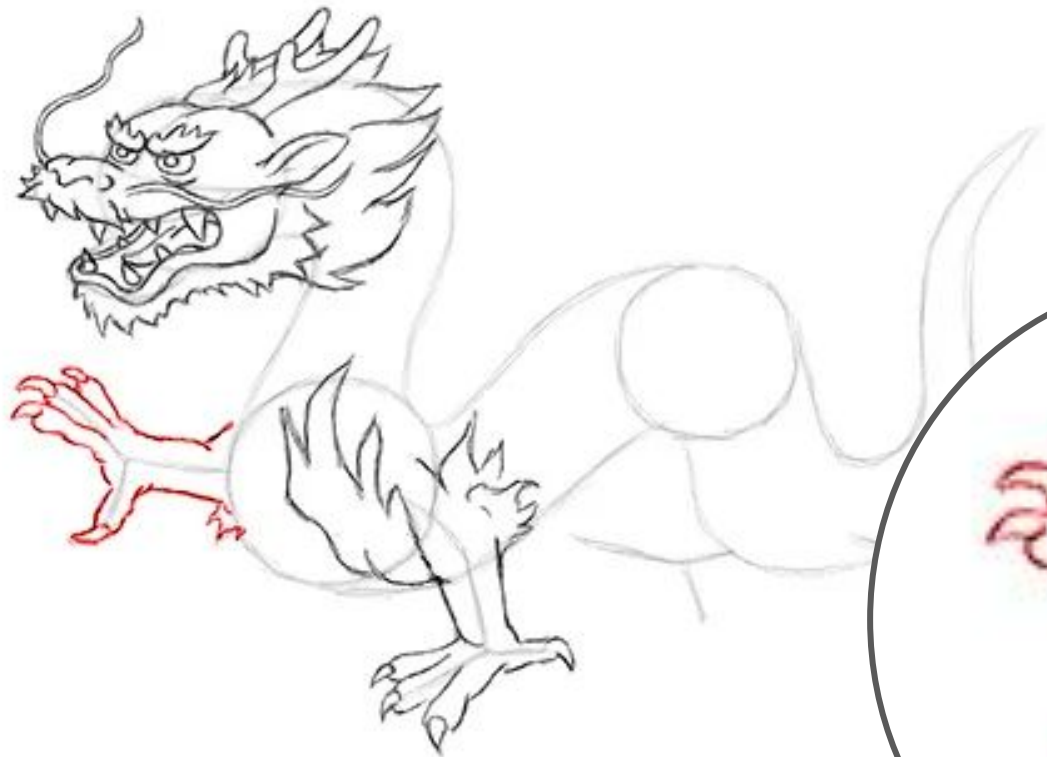

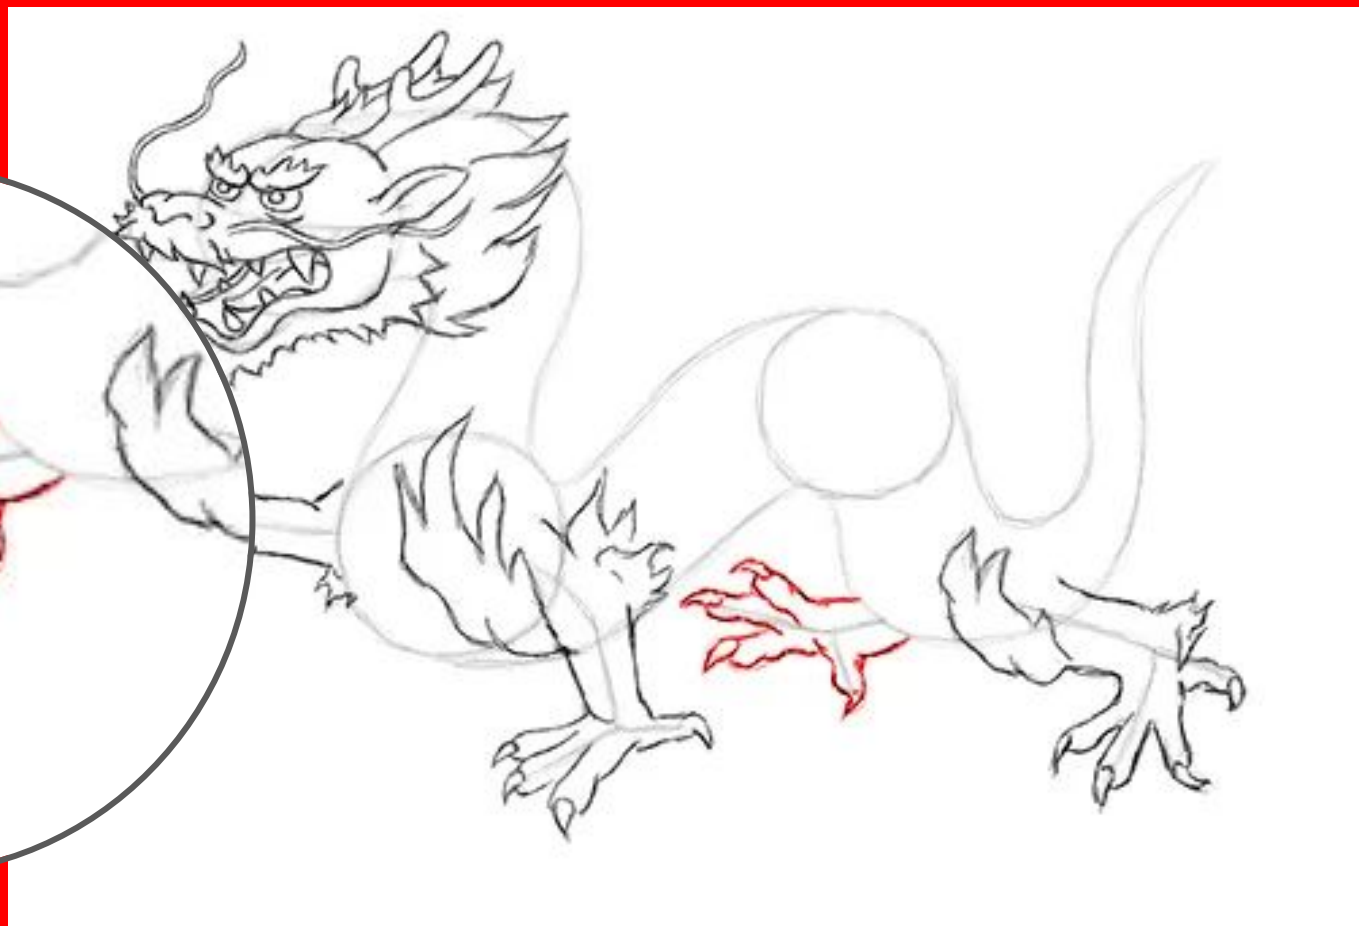

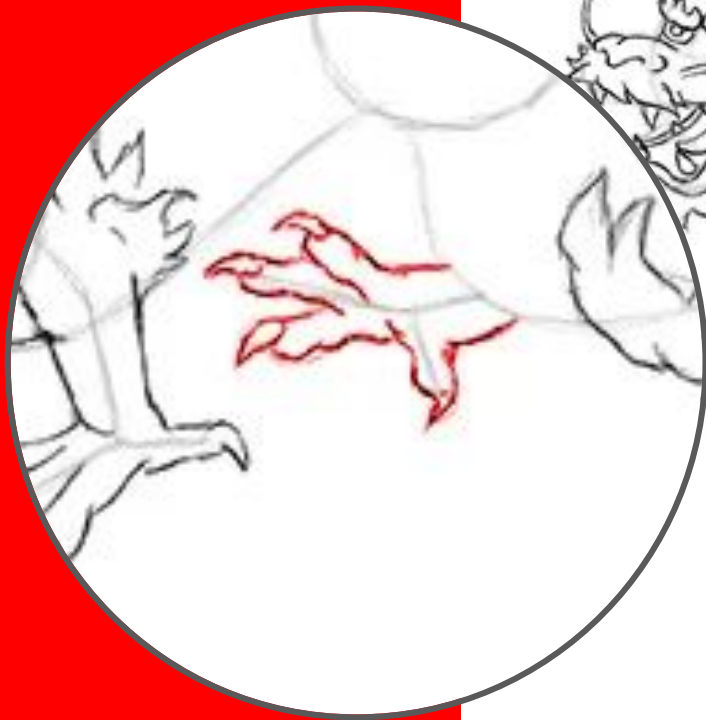

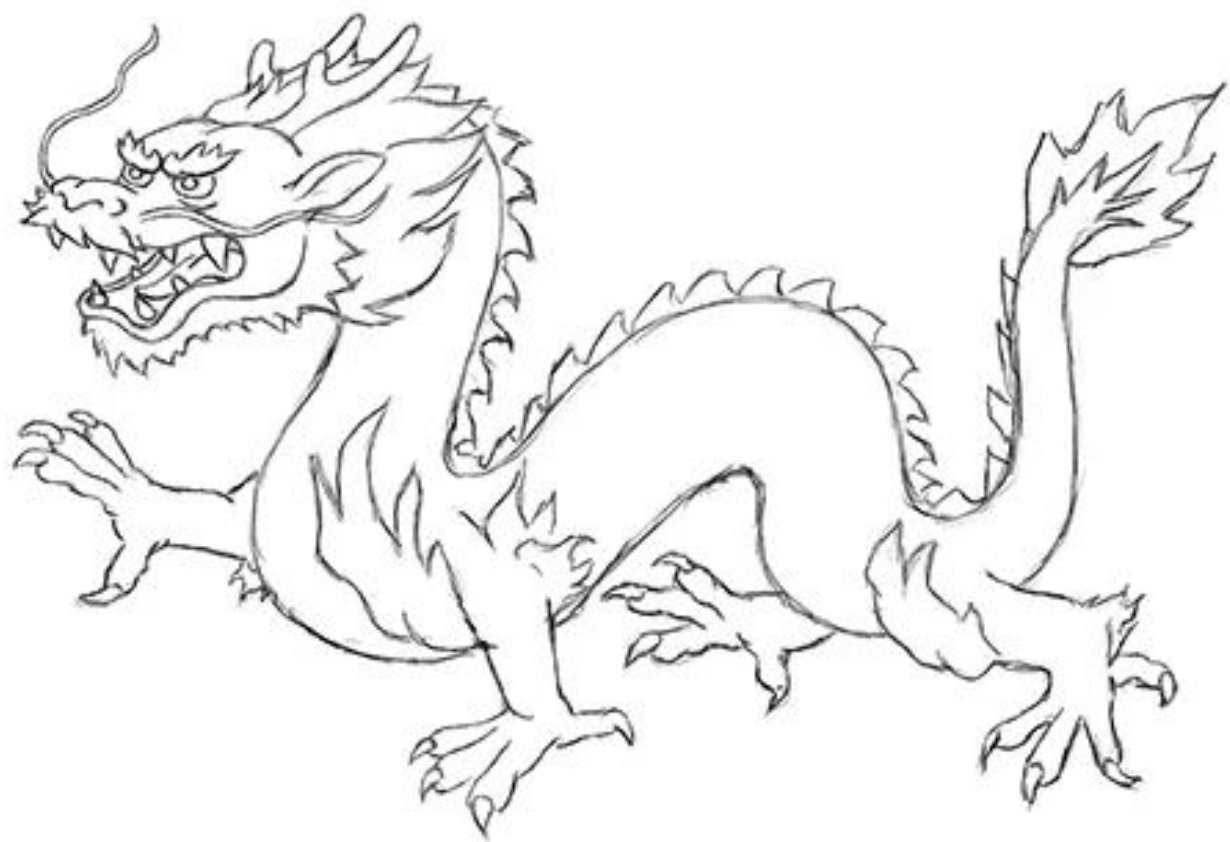

Dragon – 龍 / 龙 (辰)

2012, 2000, 1988, 1976, 1964

Each zodiac animal is associated with one of five elements: Wood, Water, Gold (or Metal), Fire, and Earth. So, for a Dragon for example, there are actually five different types: Water Dragon, Earth Dragon, and so on. This semi-formal court robe is made of tapestry-woven silk and gold-wrapped thread - perfect for a Gold Dragon!

The dragon is a supernatural beast. Historically, the Chinese believed that it could cause rain—meaning it was hugely important for a largely agricultural country. Over time, it has become a symbol of masculine vigor and fertility as well as imperial authority. Robes with five-clawed dragons like this one were restricted to the use of the emperor, the heir-apparent and high-ranking princes.
