

## Surrounded by Peace

Gmaj7                    D                    Gmaj7                    D/A

It seems so far away Lord the right words to speak

G/B                    D/A                    G                    D/F#

I feel weary from the waiting on the answers I seek

Em                    C                    D

There's a battle that's raging around me and my faith is weak

Gmaj7                    D                    Gmaj7                    D

As for you your ways are perfect Lord and your word is true

G/B                    D/A                    G                    D/F#

And you are a shield for those who put their trust in you

Em                    C                    D

Who is a rock besides you God there is no one like you

Chorus

C                    G                    C                    Cm/G                    G/D

There's a reason to believe there's a hope beyond hope

C                    D                    Em                    D

You have wrapped your arms around me and you won't let go

C                    G                    C                    Cm/G                    G/D                    C                    D                    Em

There's a comfort I know words can never express And I'll sleep sound tonight

D                    C                    Cm/G                    G

in your perfect rest even on a stormy sea I'm surrounded by peace
