OR6 INSTRUCTIONS
ODOR AND STAIN REMOVER
Shake well before using

For smoke: Spray directly onto the area. For example, spray directly onto the seat, steering wheel, and headliner in a vehicle.

CLOTHING, CAR SEATS, CARPETING: Spray directly onto the soiled area. OR6 must penetrate the stain to work effectively. OR6 does not work on any oil-based stains. OR6 works well on cat, dog, and human urine & feces as well as vomit. OR6 will also remove red wine stains. OR6 is excellent for lightly soiled areas.

OR6 works by oxidation. It does not by mask odors. It eliminates them. OR6 is effective in eliminating odors caused by fire smoke, tobacco, or campfire smoke, musty odors, and stale-cooking odors. Simply spray or wipe on full strength and let air dry to provide long-lasting residual deodorizing action. OR6 must come in to contact with the source of the odor to be effective. For pet urine stains in carpet, blot urine as dry as possible then saturate stain with OR6 through to the carpet pad.

TO SANITIZE FOOD CONTACT SURFACES: Staphylococcus aureus (ATCC 6538) and Escherichia coli (ATCC11229) **TO DISINFECT FARM PREMISES, POULTRY HOUSES, ANIMAL PENS & VEHICLES:** Remove all animals and feed from premises, vehicles, and enclosures. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes, and other facilities and fixtures occupied or traversed by animals. Empty all troughs, racks, and other feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. Saturate all surfaces with OR6 for a period of 10 minutes. Immerse all halters, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and scrapers used for removing litter and manure. Allow to air dry. Ventilate buildings, cars, boats, and other closed spaces. Drain any pooled product and/or rinse standing product with potable water. Do not house livestock or employ equipment until treatment has been absorbed or dried. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization of high-level disinfection.

Note: There is NO danger if accidentally sprayed on to skin. However, as some skin types vary in sensitivity, try and avoid spraying directly on to skin. If sprayed on skin just rinse with clear water.

Note: Odors and stains must be fresh and OR6 must go as deep as the problem area to achieve effectiveness.

- Will not bleach out fabrics
- Not to be consumed
- Safe to use around children and pets
- No need to rinse – will not leave any residue
