

PERENNIAL:

Actaea 'Chocoholic' to Adiantum pedatum

Actaea

Actaea Snakeroot 'Chocoholic' PP24,821 *Chocoholic Bugbane*

NEW! Dark, bronzy purple, nearly black, foliage has a lacy texture that looks amazing set against lime green hostas or astilbe. Fragrant bottlebrush flowers start blooming in late summer and their rich pink color ages to a pleasing white. The height of this perennial is a real bonus in the shaded garden where it reaches higher than most hosta's or astilbes, creating an airy backdrop for the wooded garden.

☀️ 🪴 🪑 H: 3-4" W: 3-3" Zones: 5-9

Actaea 'Chocoholic'

Actaea 'Hillside Black Beauty' *Hillside Black Beauty Snakeroot*

Intriguing, nearly black, deep purple foliage along with a statuesque garden form make this a plant that demands attention. 'Hillside Black Beauty' was found at Hillside Gardens in Norfolk, CT and is the darkest foliaged Cimicifuga out there and, even better, this foliage does not fade as summer heat builds. It keeps its great color all year on deeply cut, almost frilly foliage that gives the plant an airy, fine texture that is very effective grouped at the back of any partially to fully shaded garden. Its foliage provides outstanding contrast to long spikes of pure white, fragrant flowers that bloom from late August through September.

☀️ 🪴 🪑 H: 4-5' W: 2-3' Zones: 4-8

Cimicifuga 'Hillside Black Beauty'

Actaea 'Queen of Sheba' PP#21,727 *Queen of Sheba Bugbane*

NEW!

☀️ 🪴 🪑 H: 3-4' W: 2-3' Zones: 5-8

Cimicifuga 'Queen of Sheba'

Actaea Misty Blue *Misty Blue White Baneberry*

This plant is a striking, multi-stemmed woodland perennial known for its soft, bluish-green, finely cut foliage. Flowers appear in May, followed by vivid, reddish pedicels which produce large, white fruit with a distinctive black dot in autumn, persisting for 4-6 weeks. Native birds love its fruit. American Beauties Native Plants®.

☀️ 🪴 🪑 H: 2-3' W: 2-3' Zones: 3-8

Cimicifuga ramosa 'Brunette'

Actaea ramosa 'Brunette' *Brunette Bugbane*

Another stunning snakeroot selection from one of our finest Eastern natives! Deep purple leaves are almost black. Fragrant pinkish white spikes bloom August through October. Unique and incredible color in the shade garden!

☀️ 🪴 🪑 H: 3-4" W: 18-24" Zones: 4-8

Adiantum

Adiantum pedatum *Maidenhair Fern*

Feathery ornamental fern that thrives in the shaded woodland garden. A great combo with thick leaved Hosta, Brunneras and other shade loving perennials.

☀️ H: 12-30" W: 12-18" Zones: 3-8

Adiantum pedatum

PERENNIAL:

Ajuga 'Black Scallop' to Anemone 'Little Princess'

Ajuga 'Black Scallop'

Ajuga

Ajuga Black Scallop PP#15,815 *Black Scallop Bugle Weed*

'Black Scallop' is the most attractive Ajuga to come along in recent years. This low growing groundcover will quickly become your new favorite! Brilliant deep blue flowers cover this creeping beauty from May through June, creating a sharp contrast against the shiny, jet-black leaves. The wonderfully dark foliage retains its sharpness all season long in full sun or full shade, although it will be the shiniest with some sun exposure. 'Black Scallop' is perfect for use in the landscape as a mass planting, as a foreground planting or to create interesting texture and color contrasts in combination planters. 'Black Scallop' will easily outperform other Ajuga in the landscape, as it is both heat and drought tolerant once established.

☀️ 🌞 🌑 🌿 🌳 🌳 H: 3-6" W: 15-18" Zones: 4-8

Ajuga 'Chocolate Chip'

Ajuga Chocolate Chip *Chocolate Chip Bugleweed*

Our latest favorite! The tiny leaves are a rich, chocolate-brown color with hints of deep purple. Blue flower spikes arise in May, adding only two inches to the height of the plant. This miniature is perfect for small spaces or as a slow spreading groundcover. Jeepers Creepers.

☀️ 🌞 🌑 🌿 🌳 🌳 H: 2-4" W: 15-18" Zones: 3-8

Ajuga pyramidalis 'Metallica Crispa'

Ajuga pyramidalis Metallica Crispa *Metallica Bugleweed*

This shiny bronze leaved Bugleweed will quickly become one of your favorites. 'Metallica' and other Ajuga are also called Carpet Bugle because of the dense carpet that it forms quickly by its spreading rhizomes. Its aggressive nature makes it a key plant in helping to stabilize an eroding slope, creating a low maintenance groundcover for under a tree or even as a lawn substitute. Deer and rabbits don't care for the big, flashy foliage but butterflies and hummingbirds flock to the deep blue flowers that bloom in spikes above the foliage in the early summer. 'Metallica' is a tough plant whose evergreen foliage can handle most any location, sun or shade, even the occasional vehicle or bike traffic! Jeepers Creepers.

☀️ 🌞 🌑 🌿 🌳 🌳 H: 6-8" W: 12-18" Zones: 3-8

Ajuga reptans 'Burgundy Glow'

Ajuga reptans Burgundy Glow *Burgundy Glow Bugleweed*

Textured foliage creeps along in brilliant shades of pink, white and green. Flower spikes are deep blue, blooming May to June. Great color for a shade groundcover. Jeepers Creepers.

Aquilegia

Aquilegia Biedermeir *Biedermeir Columbine*

Low growing, compact perennial grown for its upright blue, pink and white flowers. Ideal for borders or woodland gardens. Good cut flower. Attracts hummingbirds.

☀️ 🌿 🌱 🌿 🌿 🌿 H: 10-12' W: 10-12' Zones: 3-8

Aquilegia Swan Pink and Yellow *Swan Pink and Yellow Columbine*

Here's your chance to get in on the ground floor with a new series of Columbine and a unique color that will draw approving nods from your customers. The Swan series of Aquilegia are the best and brightest, a new series bred for earlier and profuse flowering on very uniform plants. There are a stunning group of color combinations, but none more stunning than that of 'Swan Pink & Yellow', combining these two shades in a way that has not been seen in a Columbine before. These dense, beefy plants will bud in early April with flowers appearing later in the month that feature a light lemon yellow flower corolla set off by a coral pink horned back. You'll be amazed by the color and the sheer numbers of flowers that these tough, easy to grow plants will bring to your garden. They'll thrive in full sun or partial shade and your customers will be fighting to buy groups of them!

☀️ 🌿 🌱 🌿 🌿 🌿 H: 18-24" W: 18-24" Zones: 3-8

Aquilegia Winky Blue and White *Winky Blue and White Columbine*

A compact perennial producing masses of upright facing flowers in bicolored blooms of blue and white.

☀️ 🌿 🌱 🌿 🌿 🌿 H: 18-20" W: 12-15" Zones: 3-8

Aquilegia Winky Pink *Winky Pink Columbine*

NEW! Just in time for Mother's Day, Winky Pink Columbine flowers spring through early summer, with a showy display of soft pink upright facing flowers. Winky varieties are the most floriferous Aquilegia in the garden center and are mildew tolerant. This columbine will perform in the landscape or as a wonderful mixed container patio plant.

☀️ 🌿 🌱 🌿 🌿 🌿 H: 12-14" W: 12-14" Zones: 4-8

PERENNIAL:

Aquilegia 'Winky Red & White' to Astilbe 'Chocolate Shogun'

Aquilegia 'Winky Red & White'

Aquilegia Winky Red & White *Winky Red & White*

NEW! Winky Red and White Columbine flowers spring through early summer, with a showy display of reddish purple with white tipped corollas upright facing flowers. Winky varieties are the most floriferous Aquilegia in the garden center and are mildew tolerant. This columbine will perform in the landscape or as a wonderful mixed container patio plant.

☀️ 🌞 🌿 🪴 ✂️ 🦋 🦋 H: 12-14" W: 12-14" Zones: 4-8

Aquilegia can. 'Little Lanterns'

Aquilegia can. Little Lanterns *Little Lanterns Wild Columbine*

This power packed little gem looks too small to produce the abundance of flowers it does from April to June but seeing is believing as wave after wave of brilliant red backed, yellow corolla flowers cover this plant for weeks on end. These flowers hang like horned bells above a dense, tight foliage mound and provide the earliest source of nectar for hummingbirds available in the spring landscape. 'Little Lanterns' also provides a caterpillar food source for a number of outstanding native butterflies. It's a little plant that does it all and can even do it in dry, shady areas that tend to be difficult to landscape in. Plant this in groups and prepare for the spring show.

☀️ 🌞 🌿 🪴 ✂️ 🦋 🦋 H: 8-10" W: 8-12" Zones: 3-8

Aralia 'Sun King'

Aralia

Aralia Sun King *Golden Japanese Spikenard*

NEW! 'Sun King' is brilliant from the start with bright yellow leaves that emerge in mid spring. These leaves are held on contrasting reddish stems. In summer 2' spikes of tiny white flowers are produced, followed by deep purplish black, berries that are enjoyed by many birds in the fall. Perfect for morning sun/afternoon shade areas. Foliage retains its bright yellow color all season and looks especially nice in the semi-shaded garden planted behind hostas and ferns. Superb alone or grouped.

☀️ 🌞 🌿 🪴 ✂️ 🍷 H: 3-6' W: 3-6' Zones: 4-8

Astilbe europaeum

Asarum

Asarum europaeum *European Ginger*

The "Tiffany" of shade groundcovers, European Ginger will entice you with its amazing, deep green, shiny foliage and its dense, mounding, spreading habit. This plant's superb foliage has no peer and its ease of growth in shady, moist areas will have you searching your yard for more planting spots.

☀️ H: 6-8" W: 8-10" Zones: 4-8

Astilbe

Astilbe 'Chocolate Shogun' *PP26,430 Chocolate Shogun False Spirea*

NEW! Chocolate Shogun' Astilbe starts with a mound of rich chocolate maroon, nearly black, foliage. This foliage provides a stunning backdrop for pale pink plumes that open in late June. 'Chocolate Shogun' thrives in moist, shady locations. To keep Astilbe looking good for the next year, prune in early spring (the old foliage helps protect the plant from winter damage). Winner of the Silver Medal at Plantarium.

☀️ 🌞 🌿 🪴 🦋 H: 20-24" W: 20-24" Zones: 5-9

PERENNIAL:

Astilbe 'Delft Lace' to Astilbe arendsii 'Bridal Veil'

Astilbe Delft Lace *Delft Lace Astilbe*

Delft Lace' Astilbe has deep red stems that perfectly accent the blue-green, waxy foliage covered with a silver-lacey overlay, much like the foliage of the ever-popular selection 'Visions'. But what makes 'Delft Lace' stand out from 'Visions' is the softer, more delicately textured yet still powerful bloom. These mighty blooms are strongly held high above the foliage on candy apple red stems. The buds emerge deep salmon-pink and open to a soft apricot-pink. This remarkable Astilbe brightens up any shady area with the enchanting foliage that just keeps growing and growing over the summer months. It does not handle drought well so be sure to provide adequate water throughout the hot summer months.

☀️ 🌿 🌱 🪄 🦋 H: 24-36" W: 20-24" Zones: 5-8

Astilbe 'Delft Lace'

Astilbe Montgomery *Montgomery Astilbe*

Many people think there is no better red flowering Astilbe that 'Fanal' but we think that 'Montgomery' is far superior. Its deep red flower color in early June is richer and more vibrant than 'Fanal' but that's only the start of what makes this plant stand out. Its foliage is incredible! It emerges from the ground bronzy red in the early spring and, even as it matures to a deep, lustrous green as the spring progresses, it retains an infusion of red color that makes it jump at you from the landscape and enhances its red flower color. It's a perfect plant for partial shade and moist, well-drained soil and is a knockout when planted in groups. Watch for even more color as the hummingbirds make a bee-line to the open flowers!

☀️ 🌿 🌱 🪄 🦋 H: 16-20" W: 20-24" Zones: 3-8

Astilbe 'Montgomery'

Astilbe Peach Blossom *Peach Blossom Astilbe*

Everyone knows Astilbes are the definitive perennials for the shade or woodland garden and this selection is one of the best at filling this niche with color and low maintenance beauty. It's a sure thing, being deer and rabbit resistant, and butterflies love it for its soft, peachy-pink, airy plumes of bloom that rise above the rich fern-like foliage starting in late May or early June. 'Peach Blossom' is one of the most drought-tolerant selections of the genus and it will flower into early July for an extended show you'll look forward to every year. 'Peach Blossom' will tolerate morning sun but make sure it has enough shade so that it dependably lights up a darker area of your landscape.

☀️ 🌿 🌱 🪄 🦋 H: 18-24" W: 18-24" Zones: 4-8

Astilbe 'Peach Blossom'

Astilbe Yunique Carmine *Yunique Carmine™ Astilbe*

Compact, lustrous, fern-like foliage topped with multiple blumes of lightly fragrant, fuchsia-red flowers in June and July. Members of the Astilbe Yunique™ Series offer a higher flower scape count than most other Astilbe along with spectacular compact foliage. Excellent for shady borders or woodland gardens and good for use as cut flowers, this selection will shine grouped in the middle of a perennial garden for a massive color display.

☀️ 🌿 🌱 🪄 🦋 H: 16-20" W: 16-20" Zones: 4-9

Plants
that
Work

Astilbe Yunique Carmine PP20, 324

Astilbe Yunique Silvery Pink *Yunique Silvery Pink Astilbe*

Astilbe is one of the tried and true perennials that even your Grandmother loved. Rest assured, this is not your Grandmother's Astilbe...it's your Grandmother's Astilbe on steroids! Dense, deep green, shimmering, tightly packed foliage forms a mound and a backdrop for 6 to 8" spikes that rise above the foliage in late May. These spikes develop with buds that open in June to a massive, stunning display of light, silvery-pink flowers that makes your grandmother's Astilbe look like a 97 pound weakling in comparison. The flower plumes appear much thicker due to the far greater bud count present on them than most other Astilbe. If that is too much information, all you need to know is that you won't find a better looking Astilbe anywhere!! 'Yunique Silvery Pink' looks great alone but amazing when grouped in a semi-shaded area with moist, well-drained soil.

☀️ 🌿 🌱 🪄 🦋 H: 18-20" W: 15-18" Zones: 3-8

Astilbe 'Yunique Silvery Pink'

Astilbe arendsii Bridal Veil *Bridal Veil Astilbe*

You'd love this plant just for its foliage as ferny, shiny mounds of foliage form a beautiful tussock of green in a partial shade area. In June, flower spikes rise above the foliage and reveal airy, pure white blooms that contrast sharply with its foliage through late July, lighting up any corner of the landscape.

☀️ 🌿 🌱 🪄 🦋 H: 24-36" W: 18-24" Zones: 3-8

PERENNIAL:

Astilbe arendsii 'Fanal' to *Astilbe chinensis* 'Visions in Red'

Astilbe arendsii 'Fanal'

Astilbe arendsii Fanal *Fanal Astilbe*

Fanal' adds some color to the shaded landscape with red foliage in the spring that transitions to green for the summer months and that's just the foliage. The deep red flowers top the lacy green foliage in the hot summer months. A great selection for the shaded garden especially useful in woodland areas or where deer brows is a concern since deer and rabbits tend to leave Astilbe's alone. Thrives even in the darkest shade.

☀️ 🌞 🌿 🍷 🦋 H: 18-24" W: 18-28" Zones: 3-8

Astilbe chinensis 'Diamonds and Pearls'

Astilbe chinensis Diamonds and Pearls *Diamonds and Pearls Astilbe*

NEW! The silvery-white flowers float above a thick mound of lush green foliage. It is a strong grower with a uniform, free-flowering habit. Blooms are densely packed with as many as 1,500 white flowers per spike. Plant in groups for maximum impact adding hard to find color to the shaded garden. To keep Astilbe looking good for the next year, prune in early spring (the old foliage helps protect the plant from winter damage).

☀️ 🌞 🌿 🍷 🦋 H: 18-30" W: 12-18" Zones: 4-8

Astilbe chinensis 'Purple Candles'

Astilbe chinensis Pumila *Chinese Astilbe*

Most Chinese Astilbes are slow growing clump forming perennials, 'Pumila' is a dwarf Chinese Astilbe that spreads quicker than other Chinese Astilbes. A dark green mound of thick leaves perfectly offset the tall panicles of lilac-pink flowers. Lilac-pink flowers float above the deep foliage from late spring thru the summer months. A great selection for the shaded garden especially useful in woodland areas or where deer brows is a concern since deer and rabbits tend to leave Astilbe's alone. Thiving in the darkest shade even growing under the black walnut

☀️ 🌞 🌿 🍷 🦋 H: 9-12" W: 9-12" Zones: 4-8

Astilbe chinensis Purple Candles *Purple Candles Astilbe*

Drought tolerant perennial with purplish red flower spikes above bronzed foliage. Ideal for borders, woodland gardens or mass plantings. Excellent cut flowers.

☀️ 🌞 🌿 🍷 🦋 H: 3-4' W: 2-3' Zones: 3-8

Astilbe chinensis 'Visions'

Astilbe chinensis Visions *Visions Chinese Astilbe*

Broad leaves with deep cuts are what make this variety different from the others. Not to mention the incredibly bright lilac-purple flowers that bloom all summer. A shorter, more compact form allows for 'Visions' to be planted anywhere you have a shady gap to fill. Blooms July-August.

☀️ 🌞 🌿 🍷 🦋 H: 15-24" W: 24-30" Zones: 3-8

Astilbe chinensis Visions in Pink *PP11,860 Visions in Pink Astilbe*

A strong, sturdy, heavy bloomer just like its cousin 'Visions' but with pale pink flowers and bluish green, deeply incised foliage. The chinensis species has been having late night garden parties with all these beautiful new cultivars! This plant prefers moist soils but is one of the most drought-tolerant Astilbe's. Blooms July - August.

☀️ 🌞 🌿 🍷 🦋 H: 18-24" W: 24-30" Zones: 3-8

Astilbe chinensis 'Visions in Pink'

Astilbe chinensis Visions in Red *PP#11,965 Visions in Red Astilbe*

Same small habit like all chinensis-type Astilbes, but an incredible new flower color! Deep red buds open to pinkish-red flowers, these will surely brighten up the garden as many plants start to fade at the end of the summer. Blooms July-August.

☀️ 🌞 🌿 🍷 🦋 H: 18-24" W: 24-30" Zones: 3-8

PERENNIAL:

Astilbe chinensis 'Visions in White' to *Astilbe x hybrida* 'Boogie Woogie'

Astilbe chinensis Visions in White *Visions in White Chinese Astilbe*

The shaded woodland garden is one of the toughest spots in the landscape to find plants that will thrive but, Visions in White Astilbe is the perfect summer blooming perennial for such a site. Striking bright white plumes rise above a mound of glossy, deeply cut, almost fern-like foliage in early June and continue to shine in these dark landscape spots right through early July. While its compact, clump forming foliage adds great texture to the partially shaded garden both before and after the flowers, it's really those fat triangle of pure white that will really grab your attention. Thriving in moist, organic soils, 'Visions in White' is deer resistant and butterflies will flock to its pure, bright plumes as much as you will! Plant it in groups for a stunning show or use it in a mixed perennial container for a semi-shaded deck or patio where its bloom and texture will shine!

☀️ 🌿 🌱 🌿 🦋 H: 20-28" W: 12-18" Zones: 4-8

Astilbe chinensis 'Visions in White'

Astilbe japonica Deutschland *Deutschland Astilbe*

Deutschland' Astilbe starts the spring with a mound of bronzy, deep green foliage. This deeply cut foliage provides great texture for any shady area spring through fall and provides a stunning backdrop for creamy white plumes that rise above the foliage and open in late June attracting nectar seeking hummingbirds and butterflies. 'Deutschland' thrives in moist, shady locations and is popular for border plantings or alongside water areas. Its magnificent blooms are superb for both fresh or dried flower arrangements while its dark foliage blends seamlessly with small to medium size gold-leafed hostas or ferns. Plant this deer, rabbit, slug and rodent resistant beauty in groups for maximum impact. In order to keep Astilbe looking good for the next year, do not cut it back in the winter, (the old foliage helps protect the plant from winter damage), but prune in early spring.

☀️ 🌿 🌱 🌿 🦋 H: 20-24" W: 18-24" Zones: 4-8

Astilbe japonica 'Deutschland'

Astilbe japonica Rheinland *Rheinland Astilbe*

This early blooming beauty will captivate you with mounding, deeply cut, lustrous, dark green foliage and an ample display of airy, pale pink flower spikes starting in mid to late May and continuing into late June.

☀️ 🌿 🌱 🌿 🦋 H: 24-30" W: 24-30" Zones: 3-8

Astilbe japonica 'Rheinland'

Astilbe simplicifolia 'Hennie Graafland' *Hennie Graafland Astilbe*

Hennie Graafland' refuses to be unnoticed in the garden. It all starts with foliage that may be the best of any Astilbe featuring a delicate, deeply cut look that begs to be touched. Along with this texture comes tremendous foliage color, the deepest of deep green, that is even showier due to its shine that makes it look like it was just waxed. A striking, showy June bloom stands above the foliage in big, light pink triangles that seem even more noticeable backed by the shiny foliage. Perfect for massing in partial shade, this plant can be the star of your garden, a job that Hennie will be happy to accept

☀️ 🌿 🌱 🌿 🦋 H: 15-18" W: 20-24" Zones: 4-8

Astilbe simplicifolia 'Hennie Graafland'

Astilbe x ardensi Ice Cream *Ice Cream Astilbe*

NEW! Masses of soft pink, feathery plumes sit above glossy, dark green foliage in mid to late summer. The perfect ice cream for a cool, shady garden! Divide clumps every 3 or 4 years to maintain vigor. Cut back to the ground in late fall.

☀️ 🌿 🌱 🌿 🦋 H: 24-30" W: 18-24" Zones: 4-8

Astilbe x ardensi 'Ice Cream'

Astilbe x hybrida Boogie Woogie *Boogie Woogie False Spirea*

A bright, fluorescent pink introduction in the "Music" series from hybridizer Harrie Verduin. It is a brighter, lighter pink selection with enormous blooming power.

☀️ 🌿 🌱 🌿 🦋 H: 20-25" W: 15-18" Zones: 3-8

Astrantia major 'Star of Fire'

Athyrium

Athyrium filix femina *Common Ladyfern*

Bright green, lacy fronds rise from the crown of this hard working Fern creating a fine textured, robust vase shaped plant that provides cover for ground frequenting birds and other landscape critters. This deciduous fern is vigorous, easy to grow and thrives in shady, moist areas, but can tolerate some sun and drier soils. Mass plantings of this delicate fern will make an outstanding groundcover in areas where other plants find it hard to survive and its fronds are perfect for use in fresh flower arrangements.

☀️ 🌞 🌿 🌱 🪄 ✂️ H: 24-36" W: 12-18" Zones: 4-8

Athyrium filix femina Lady in Red *Lady in Red Lady Fern*

This impressive shade lover is one of the most tolerant ferns you can grow while providing a subtle injection of color into an area that may need a little shaking up at times! Lacy, deep green fronds are held aloft by vibrant burgundy stems to create a bi-color fountain effect in the landscape that is outstanding and loaded with texture. 'Lady in Red' forms a sizeable clump as it matures and provides excellent cover to a number of native songbirds while providing nesting material from dried fronds. Plant it in groups in moist soils for best performance but 'Lady in Red' is one of the most tolerant ferns of slightly drier soils, too! American Beauties Native Plants®.

Athyrium filix femina

Bergenia

Bergenia Heartleaf *Bergenia 'Pink Dragonfly' Pink Dragonfly Pig-squeak*

NEW! Bright pink blooms are held above narrow green foliage that can turn a vivid purple color in the fall. The evergreen foliage and flowers can be used in bouquets. Great winter interest plant. Reblooms in the fall depending on the season.

☀️ 🌞 🪄 ✂️ 🌱 🪄 H: 10-15" W: 10-12" Zones: 3-8

Bergenia Overture *Overture Heartleaf Bergenia*

NEW! This early blooming, shade loving perennial will thrill you for its bloom but its foliage is one of those subtle landscape charms that can become the bedrock of the garden. Big, rounded, evergreen, fleshy leaves form a tight, pleasing mound almost like a small, succulent Hosta. Its leaves are dark and shiny green in the spring and summer and will take on a distinctive purple hue as the cold weather of fall and winter hit. Fleshy flower stalks bearing loads of small buds rise above the still purplish foliage in late April and burst into a flaming fuschia color that is totally unlike the flower of any other early spring bloomer. Its flowers last well into May as the foliage greens to greet the warming temperatures. Plant 'Overture' in big groups to give your semi-shaded garden some real winter substance and some wonderful, electric early to mid spring color!

Brunnera 'Alexander's Great'

Brunnera macrophylla 'Queen of Hearts' PPAF *Queen of Hearts Heartleaf Brunnera*

NEW! Heart-shaped leaves have a silver overlay and a narrow band of dark green veining. Baby blue, forget-me-not type blossoms. Offers easy maintenance and is the perfect plant for that shady spot. Attracts bees as well as resists deer. Expect blooms in mid to late spring.

☀️ 🌱 🌿 🌱 🌱 🌱 H: 16-18" W: 28-36" Zones: 3-8

PW PROVEN WINNERS

Brunnera macrophylla 'Queen of Hearts'

Caltha

Caltha palustris *Marsh Marigold*

Early to show in the garden, Marsh Marigold is at home in the most moist part of the landscape, in fact, it will not tolerate drying out and prefers at least some partial shade. Plant it in groups in any wet areas and get prepared for a show with almost fleshy, deep green, rounded foliage emerging early and held aloft on stalks with longer stalks pushing flower buds above the foliage in late April. These buds open in early May to reveal clusters of waxy yellow cups that contrast with the foliage and put on a great show into early June. Marsh Marigold is a great early nectar source for native bees and insects and a great source of cover for loads of landscape critters. American Beauties Native Plants®.

Plants that Work

Campanula 'Dickson's Gold'

Carex

Carex appalachica *Appalachian Sedge*

If you are looking for a real texture contrast and a plant that will thrive in partial to full shade, Appalachian Sedge may be the answer. All sedges love shade but many are much stiffer and with wider bladed foliage than appalachica. Its foliage is very thin, long, and wispy, creating a much lighter texture and a flowing, almost mop-like look that is very attractive. This American Beauties sedge does not have the showy bloom that other Carex display but its somewhat insignificant bloom still provides nectar for important native insects and seed for native birds, while its flowing form is sure to add luster to any woodland setting in your landscape. American Beauties Native Plants®.

☀️ 🌱 🌿 🌱 🌱 H: 12-18" W: 12-15" Zones: 4-8

AMERICAN BEAUTIES NATIVE PLANTS Make your garden come alive!

Carex appalachica

PERENNIAL:

Carex laxiculmus Bunny Blue (Hobb) to Carex pennsylvanica

Carex laxiculmus Bunny Blue (Hobb)

Carex laxiculmus Bunny Blue™ (Hobb) Bunny Blue™ *Sedge*

Brighten up any shade to semi-shade area with this striking, mounding little grass. 'Bunny Blue' is evergreen, so its tussock metallic-blue foliage is visible year round, plus its foliage is wider than many other Carex adding great texture to an already great looking, functional plant. 'Bunny Blue' is perfect for grouping in a shaded rock garden and thrives in moist, well-drained locations. It provides great cover for a variety of landscape critters and even is resistant to deer damage. American Beauties Native Plants®.

☀️ 🌿 🦋 🦋 🦋 🦋 H: 10-12" W: 12-15" Zones: 5-9

Carex morowii 'Ice Dance'

Carex morowii Ice Dance *Ice Dance Variegated Japanese Sedge Grass*

At first appearance this grass looks great, but maybe a little too delicate for your landscape situation. Looks can be deceiving because its delicate appearance belies the fact that 'Ice Dance' is a tough, colorful, all-purpose, all exposure grass that demands a home in your garden. Half inch wide, deep green blades are brightly bordered in pure white and form a dense, spreading, rounded clump that is neat and well kept. Carex are native to shaded woodland areas so 'Ice Dance' performs well in shade but also thrives in partial shade or sun. Delicate brown flower tassels rise above the foliage in mid-spring adding even a little more to a plant that deserves a lot of garden play.

☀️ 🌿 🦋 🦋 🦋 🦋 H: 10-12" W: 12-15" Zones: 5-8

Carex morowii 'Silver Sceptre'

Carex morowii Silver Sceptre *Silver Sceptre Sedge*

Crisp white variegation sets this Carex apart. Leaves are narrow and have a tight, clumping form with a clean landscape appearance. Nice and bright, overall silvery effect for an otherwise shady location. Great liriopie substitute for Northern climate.

☀️ 🌿 🦋 🦋 🦋 🦋 Zones: 5-8

Carex morowii Evergold *Evergold Variegated Japanese Sedge*

While not having a significant flower, the bold yellow variegation makes this grass outstanding. Does well in the shade, a rarity among ornamental grasses. Blooms in July.

☀️ 🌿 🦋 🦋 🦋 🦋 H: 12-18" W: 12-15" Zones: 5-8

Carex morowii 'Evergold'

Carex pennsylvanica *Pennsylvania Sedge*

You might never notice this plant until you saw it perform in dry, dark, shaded landscape areas where its ability to grow, shine, and thrive will definitely grab your attention. Its glossy green foliage is one of the first to emerge in the early spring landscape, forming a pleasing rounded tuft that keeps its fresh look throughout the growing season. Seed stalks rise above foliage in late spring holding yellowish-brown flowers aloft that provide nectar to butterflies and seed for songbird feeding as the flowers fade. Since this plant thrives even under oaks, why not plant it in groups in this difficult area and watch it light up the darkness with greenery and an American Beauties show of critter color? American Beauties Native Plants®.

☀️ 🌿 🦋 🦋 🦋 🦋 Zones: 4-8

Carex pennsylvanica

PERENNIAL:

Carex stricta " to Clematis Edda™

Carex stricta Tussock Sedge

Tussock sedge grows in 2-3' tall clumps about 2' wide. As old leaves die, they build up around the living plant, making a "tussock" or little hill. It grows in or near water and spreads by rhizomes to make new clumps. As new tussocks form, they trap water between them, helping other aquatic plants get established. It also creates quality cover for breeding frogs, toads, salamanders and insects. Plants are great nest and perching sites for birds, including ducks, small herons, swamp and song sparrows, geese, and others. Other birds use leaves and stems to build nests and a number of birds and small mammals such as mallard, wood duck, wild turkey, cardinal, junco, squirrels feed on the seeds. American Beauties Native Plants®.

☀️ 🌞 🌿 🌱 🌾 H: 2-3' W: 2-3' Zones: 5-8

Chasmanthium latifolium

Chasmanthium

Chasmanthium latifolium Northern Sea Oats

It's amazing how tolerant this grass is without giving up anything in the beauty department. New stems emerge from the soil each spring forming an upright clump with wide, deep green grass blades that curl downward at the end giving a pleasing upright yet flowing texture. Seed stalks rise above the foliage in the summer and flower in August, bearing unique wide, flattened seed heads that are outstanding ornamentally and cherished by colorful birds for late summer and fall feeding. Even this plant's coppery winter foliage color adds to the landscape while its tolerance of any conditions from dry and shaded to sunny and moist make it into one of the garden workhorses in the American Beauties landscape. American Beauties Native Plants®.

☀️ 🌞 🌿 🌱 🌾 H: 6-10" W: 6-10" Zones: 3-8

Chrysogonum virginianum

Chrysogonum

Chrysogonum virginianum Golden Star

This American Beauties gem is incredibly adaptable making it an indispensable part of your landscape. Why you ask? How many other plants thrive in full sun or full shade the way Golden Star does? It's the little powerhouse that gets the job done in moist or dry soils forming a low, mounding plant with dark green leaves that set off bright yellow, daisy-like flowers that bloom throughout June and July. Plant it in groups to cover and area or use it in small spaces that could use a plant that performs effortlessly. Jeepers Creepers.

☀️ 🌞 🌿 🌱 🌾 H: 6-8" W: 12-15" Zones: 5-8

Clematis Edda™

Clematis

Clematis Edda™ Edda™ Clematis

NEW! A new introduction at the 2014 Chelsea Flower Show and part of Raymond Evison's contemporary gold-medal-winning exhibit. A plant of very compact habit. As the first flowers of the season open it is already producing new stems and the second crop of flowers. Ideal for the small garden balcony, deck garden or patio when grown in the garden or in a container. However, it is stunning when used and grown by itself or with other annuals in a hanging basket. As its first flowers are blooming, it is already producing trailing stems that hang down with even more flowers. Looks outstanding with grey foliated plants. Raymond Evison.

☀️ 🌞 🌿 🌱 🌾 H: 3-4' W: 2-3' Zones: 4-9

PERENNIAL:

Clematis Endellion™ to Convallaria majalis

Clematis Endellion™ *Endellion™ Clematis*

NEW! Clematis Endellion™ was launched at the 2015 Chelsea Flower Show and has been selected for its strong pink-coloured flowers, which are produced in great abundance. This new clematis is a great plant for growing up into roses at the base of an archway or a pergola and looks stunning with deep yellow or red roses. Also ideal for growing into free-standing or wall-trained shrubs or other climbers. A useful plant that flowers slightly later than the early large-flowered clematis for growing in a container, on the deck garden, patio or outdoor dining area. Raymond Evison.

☀️ 🌞 🌱 🪴 🍷 H: 4-5' W: 3-4' Zones: 4-9

Clematis Samaritan Jo™ *Samaritan Jo™ Clematis*

NEW! A clematis with a distinctly different flower and flowering habit, which produces many blooms at one time. Named in recognition of the great volunteer work that the Samaritans offer to people in distress. All volunteers are known as Samaritan Jo. A stunning and rewarding plant for a garden location or for growing in a container for the deck garden, patio or outdoor dining area. Launched at the 2013 famous Chelsea Flower Show from Raymond Evison's exhibit with the daughter of the founder of the Samaritan organisation. Raymond Evison.

☀️ 🌞 🌱 🪴 🍷 H: 4-5' W: 3-4' Zones: 4-9

NEW! Raymond Evison.

☀️ 🌞 🌱 🪴 🍷 H: 4-5' W: 2-3' Zone: 4-9

Clematis Tranquilite™ *Tranquilite™ Clematis*

NEW! An exceptional and attractive free flowering plant which is great for the smaller garden due to its compact habit. A superb plant for growing in a shaded area such as a north-facing wall or in a container in a shaded outdoor eating area, patio or deck. Try planting this summer bloomer to climb up spring or fall-blooming shrubs. Raymond Evison.

☀️ 🌞 🌱 🪴 🍷 H: 4-5' W: 2-3' Zones: 4-9

Convallaria

Convallaria majalis *Lily of the Valley*

Old fashioned and very dependable, this leafy groundcover spreads by stolons and can create big patches of its wide, upright held, deep green foliage in partial shade or shade locations. While its foliage stays clean and distinctive throughout the growing season, it's the Lily of the Valley flower that gets most of the attention with its white, nodding bells, strung together on drooping stems that bloom in April and May and fill the air with their sweet scent. These bells droop their way out of the foliage making a pretty picture and a great cut flower, too! Jeepers Creepers.

☀️ 🌞 🌱 🪴 🍷 ✂️ H: 6-8" W: 18-24" Zones: 3-8

PERENNIAL:

Dicentra eximia to *Dicentra 'Gold Heart'*

Dicentra

Dicentra eximia Wild Bleeding Heart

This American Beauties gem brings an incredible ability to produce flowers from April to September while thriving in partially shaded to shaded, moist areas in the landscape. Not only does this plant produce an amazing amount of deep, pinkish-red, heart shaped flowers, its deeply cut, almost frilly, grayish-green foliage lends a softening texture to any landscape planting. Plant it in groups and know that its flowers are a source of hummingbird and butterfly nectar while its low, spreading form is perfect cover for smaller critters. In hot summers this plant may not produce as many flowers but it will still retain its cooling, soft landscape presence you'll treasure.

☀️ 🌞 🌿 🌱 ✂️ 🪴 H: 12-18" W: 18-24" Zones: 3-8

Dicentra 'Luxuriant'

Dicentra formosa 'King of Hearts' King of Hearts Bleeding Heart

This dwarf hybrid bears rosy pink heart-shaped blooms all season long. Foliage is grayish green and finely cut, yet provides more substance and texture than *Dicentra eximia*. An easy growing, disease-free cultivar you are sure to love. Pink Ribbon Plant™ to benefit breast cancer research.

☀️ 🌞 🌿 🌱 ✂️ 🪴 W: 15-18" Zones: 3-8

Dicentra eximia

Dicentra formosa 'Luxuriant' Luxuriant Bleeding Heart

Old fashioned perennial with clusters of weeping cherry-red flowers in summer. Attractive blue-grey foliage. Clump-forming plant. Prefers organic fertilizer. Deadhead regularly to extend blooming period. Prefers a moist, well drained soil in part shade. Tolerates full sun.

☀️ 🌞 🌿 🌱 ✂️ 🪴 H: 12-15" W: 12-15" Zones: 3-8

Dicentra formosa 'King of Hearts'

Dicentra spectabilis Old Fashioned Bleeding Heart

Old-fashioned bleeding heart. Largest flowers of the group, pleasantly pink. Round growth habit brings the plant to 30" tall and wide. Blooms May through June. Potential mid-summer dormancy, yet will reflower with sufficient moisture and shade.

☀️ 🌞 🌿 🌱 ✂️ 🪴 H: 24-36" W: 18-36" Zones: 2-8

Dicentra spectabilis 'Alba' White Bleeding Heart

A perfect foil to its pink and white flower colored cousin, 'Alba' is a magnificent presence in the spring garden with fleshy, medium green, deeply cut foliage forming a considerable mound topped by strings of pure white bleeding heart flowers starting in late April and blooming into late May. Its size and its blooming power can leave you breathless, as this traditional garden plant still packs a powerful punch after all these years. Plant 'Alba' in semi-shaded to shaded areas and in moist, well-drained soils and feel free to combine them with *spectabilis* for a fantastic display of bloom!

☀️ 🌞 🌿 🌱 ✂️ 🪴 H: 24-30" W: 24-30" Zones: 3-8

Dicentra spectabilis

Dicentra spectabilis 'Gold Heart' Gold Hearts Bleeding Heart

Try this for a new twist on an old fashioned plant... gold foliage! That's right, 'Gold Heart' has the Bleeding Heart flower that we all know and love each spring, but with a bright twist of gold foliage that doesn't fade and noticeably brightens the partially shaded growing area that is ideal for this selection. 'Gold Heart' is as vigorous as the old fashioned Bleeding Heart, forming a dense, considerably sized clump that begins to bud and bloom early, usually in early May, and continues into mid June, with a multitude of arching strings of rose pink heart shaped flowers. The gold foliage is deeply cut and clean until the plant begins to go dormant in mid-summer. Plants That Work.

Dryopteris marginalis

Diervilla

Diervilla sp Kodiak® Red PP28,403 Kodiak® Red Bush Honeysuckle

NEW! Rugged beauty for the toughest spots in your landscape. Kodiak Red diervilla is a native flowering shrub that looks great while shrugging off shade and problem soils. New growth emerges in spring with a deep burgundy tone, and turns vivid red in fall. During summer, leaves have a red edge and clusters of small yellow flowers appear all season. It's a simple but beautiful way to add low-maintenance color to parts of your yard that have been difficult to landscape. Proven Winners.

☀️ ☀️ ☀️ 🌿 🍷 ✂️ H: 36-48" W: 48-60" Zones: 4-7

Diervilla sp Kodiak® Red

Dryopteris

Dryopteris *goldiana* Goldy's Wood Fern

Named after Scottish Botanist, John Goldie, this large fern has green fronds that will rise above most hosta's and Hellebores in the woodland garden. Stately with an arching, vase-like form, this shade lover will likely be the largest of its type in the garden with tall fronds that can top off at 4'. Easy to grow with little care necessary. Perfect for massing in any shady woodland garden. Adds spectacular height and texture to the woodland garden. Deer resistant. Thrives in partial to full shade. Feed yearly with an organic fertilizer. No pruning necessary, just clean up old, damaged fronds before spring flush. Protect from winter winds.

☀️ 🍷 🍷 H: 3-4" W: 2-3" Zones: 3-8

Dryopteris *marginalis* Leatherwood Fern

NEW! Evergreen fern which grows into a tight, flowing form. New leaves emerge light green, mature lustrous, grayish-green leathery fronds. Invaluable to native birds, and creates a year-round textural presence in the shade garden.

Helleborus Ivory Prince *PP16,199 Ivory Prince Christmas Rose*

Outstanding Hellebore selection bred by British plantsman David Tristram. Forms a mound of leathery evergreen leaves, veined in silver. Charming, mid-spring display of reddish-pink buds that open into upfacing creamy-white flowers flushed with pink and green. Excellent groundcover, borders, containers and rock gardens.

H: 12-18" W: 18-24" Zones: 5-8

Helleborus Mango Magic *Mango Magic Lenten Rose*

NEW! A mix of wonderful flower colors and shapes ? including large, 3" single and double petalled blooms in both solid and speckled shades of white, green, pink, red and purple. Long blooming from late winter through spring with deep, evergreen foliage.

H: 20-24" W: 20-24" Zones: 4-8

Helleborus Pink Frost *Pink Frost Lenten Rose*

Bold, beefy and beautiful, this member of the Gold Collection® of Hellebores will give you cause for celebration as one of the first flowers to bloom in your garden after a long, cold winter. And, you won't just be celebrating only a flower or two on some wimpy plant that looks like it was lucky to eke through winter... 'Pink Frost' powers its way through the winter with its spreading mound of leathery, silvery, deep green, evergreen foliage that serves as the release point for stems that hold up burgundy to white buds a discreet distance above the leaves. These buds open at the first hint of warmer weather in March with a flurry of light pink flowers with fat petals surrounding a circle of golden stamens. These flowers gradually darken as they age to a deep burgundy shade that will shine in the garden. Plant 'Pink Frost' in partial to full shade alone or in a group...it likes good soil moisture but good drainage is very important for it to safely make it through the winter.

Helleborus Winter Sunshine *Winter Sunshine Hybrid Lenten Rose*

NEW! 'Winter Sunshine' possesses a low mound of leathery evergreen leaves and boasts large single white flowers that turn to pink and red with age. Avoid pruning unless to remove dead leaves. Can be divided every few years after flowering in late spring. Unlicensed propagation prohibited. Caution: harmful if eaten. Although beautiful, 'Winter Sunshine' can also be a skin irritant.

☀️ 🌱 🌿 H: 12-16" W: 16-18" Zones: 4-9

Helleborus Winter Thrillers™ Wedding Ruffles *Wedding Ruffles Lenten Rose*

NEW! Ruffled skirt of pristine white petals surrounding a bunch of sunny yellow stamens in the center of each flower. Early and spectacular these colorful blooms are long lasting. Easy to grow with few pests. Perfect for grouping in the middle of a garden. Deer and rabbit resistant.

☀️ 🌱 🌿 H: 18-24" W: 20-24" Zones: 4-8

Helleborus niger HGC Jacob *Jacob Christmas Rose*

What a novelty! A plant in your landscape that blooms at the onset of winter! 'Jacob' is just such a plant and you will fall in love with the uniqueness and the added garden thrill this member of the Gold Collection® of Hellebores developed in Europe will bring you. Its deep green foliage forms a tight, leathery, evergreen mound that sees stems with buds rise above in early November. These flower stems themselves are quite decorative with deep red color that contrasts well with the foliage and with the flowers themselves that will open in late November with a snow white color that will melt your heart. Flowers will last until mid-January. Plant 'Jacob' in a protected, semi-shaded landscape spot with exceptional drainage and enjoy the holiday show that will become as much a part of your season as Christmas Cactus and Poinsettias!

☀️ 🌱 🌿 H: 9-12" W: 12-15" Zones: 4-8

Helleborus niger Merlin *Merlin Christmas Rose*

NEW! Light, whitish-pink flowers are set off by dark green foliage. Flowers bloom from February until April, maturing to a rich cranberry color. A colorful addition to flower beds, borders, and containers. Deer and rabbit resistant! Plant in an area with well-drained soil, and mulch in the summer to maintain moisture.

☀️ 🌱 🌿 H: 8-12" W: 24-32" Zones: 4-9

Helleborus x HCG® Mahogany Snow *Mahogany Snow Helleborus*

NEW! A true harbinger of spring with late February through April bloom featuring large, creamy white flowers that are dusted light pink on the petal undersides. As the flowers age they continue to deepen to mahogany pink. The compact habit is superb and its evergreen foliage is accented by red stems. The earliest perennial to bloom in the landscape. Long lasting, color changing blooms are breathtaking. Superb evergreen foliage. Wonderful when used singly or in groups. Deer resistant.

☀️ 🌱 🌿 H: 12-15" W: 16-20" Zones: 5-8

Heuchera

Heuchera 'Lime Marmalade' PP21,861 *Marmalade*™ *Lime Coral Bells*

While this selection adds great color to the garden, it might be the texture it provides in the form of frilly, deeply cut foliage that will really catch your eye. 'Lime Marmalade' is an aggressive grower and aggressive about getting your attention with that unique foliage that emerges and forms a beefy rounded mound in April and that striking lime green to chartreuse foliage color that will light the darkness of any shady landscape spot. Like all Heuchera, 'Lime Marmalade' sends up thin flower stalks above the foliage with buds that bloom in May and June with white flowers that are attractive yet will still take a backseat to this plants color and texture. 'Lime Marmalade' prefers partial sun to full shade and is fabulous grouped in the ground or interspersed with other perennials in a planter to add that needed zing of color and texture

☼ ☼ H: 10-12" W: 12-15" Zones: 4-8

Heuchera Carnival Plum Crazy PP24,771 *Carnival Plum Crazy Coral Bells*

NEW! Thick, maple-like, dark purplish foliage frosted with silver and dark veins forms a pleasing tight mound. Flower stems rise above foliage in late May bearing white bell flowers through June. Striking foliage color. Deer resistant. Attracts hummingbirds. Drought resistant when established.

☼ ☼ H: 10-15" W: 12-14" Zones: 4-8

Heuchera Champagne PPAF *Champagne Coral Bells*

NEW! This is a stunning plant with medium size leaves changing from peach to gold to champagne-gold with a strong white veil overall. Free-flowering maroon stems with light peach flowers most of the season.

☀️ 🌞 H: 8-10" W: 20-24" Zones: 4-9

Heuchera hybrid Dolce® Key Lime Pie USPP 16,735 *Key Lime Pie Coral Bells*

Bring that tropical feel to your garden with a Terra Nova Nursery treat that gives you the color of the tropics on a plant that is tough, hardy, and adaptable in the landscape. This plant grows vigorously with tangy lime green foliage forming a tight, dense, spreading mound that looks just as nice in full sun as it does in full shade. A profusion of flower stalks rise above the leaves in spring, carrying small, dainty, creamy white flowers in bunches from May into July, so local butterflies and hummingbirds come by to sample their nectar. Group planting in well-drained soil injects tropical warmth immediately, but don't forget to try using 'Dolce® Key Lime Pie' in mixed containers for an exciting blast of foliage color. Proven Winners.

☀️ 🌞 H: 12-15" W: 15-18" Zones: 4-9

Heuchera hybrid Dolce® Silver Gumdrop USPPAF *Silver Gumdrop Coral Bells*

NEW! Use this silver beauty to brighten up your shade garden! Semi-glossy, iridescent silver leaves are topped with vibrant pink flowers. Leaves take on a rosy blush overtone later in the season.

☀️ 🌞 H: 6-8" W: 20-24" Zones: 4-9

☼ ☼ H: 8-10" W: 26-30" Zones: 4-9

Heuchera villosa 'Autumn Bride'

Heuchera villosa Autumn Bride Autumn Bride Coral Bells

The native plant enthusiast in you will love this for its size and flowering uniqueness in the Heuchera world. The first thing that will jump out at you is the foliage, emerging from the ground in early spring with big, trident-like lime green to chartreuse leaves that are up to 50% larger than most selections. Big foliage makes for a big profile in the garden an impressively large yet neat mound that towers over it Heuchera neighbors. Finally, its unique bloom time, form and showiness will astound you with spikes forming in late July and rising above the foliage to erupt in plumes of pure white bloom in September, far later than most Heuchera. Native insects will love the flowers, landscape critters the cover and you'll love the fact it grows in any semi to full shade location American Beauties Native Plants®.

☼ ☼ H: 18-24' W: 2-3' Zones: 3-8

Heuchera villosa 'Caramel'

Heuchera villosa Caramel Caramel Coral Bells

Today it seems as if the garden world is being overrun by Heuchera. It's hard to choose the right variety for your garden, one that is spectacular but will still thrive with a minimum of care and fuss. 'Caramel' is just such a variety. One of its parents is Heuchera villosa, a vigorous, tough native and 'Caramel' derives outstanding garden strength and durability from this parentage while showing off with some of the most spectacularly colored foliage you'll find on any plant. It's a bold combination of yellow, orange, and red shades that shines in the garden and keeps its unique, scintillating color throughout the growing season. Thin flower stalks rise above the foliage carrying small white flowers in the summer months that attract hummingbirds to add to the color show in your garden. Plant 'Caramel' in a partial to full shade area and get ready for a Heuchera that lives up to its billing.

☼ ☼ H: 12-15" W: 15-18" Zones: 4-8

Heuchera x 'Grape Soda' PPAF

Heuchera x Grape Soda PPAF Grape Soda Coral Bells

Amazing rose pink spring foliage is a beacon of color in the drab spring landscape. Light-purple flowers bloom during spring and summer attracting butterflies as well as hummingbirds. During these hot summer months the foliage transitions to a purple burnished with silver creating a great backdrop for other summer blooming flowers. A great selection for bringing color and texture to shady spots or beneath pines and other evergreens.

☼ ☼ H: 9-18" W: 18-22" Zones: 4-10

Heucherella

Heucherella Gold Zebra Golden Zebra Foamy Bells

You might not find a perennial that does a better Coleus impersonation than 'Golden Zebra'. Its striking, two-toned foliage with dark red centers surrounded by shocking yellow edges and its deeply cut leaf form screams out to you that this must be the best low, dense, mounding Coleus you've ever seen. Fortunately for you, it's not a Coleus but one of the best, easy care perennials you can grow in partial sun or full shade. It will make a stunning landscape statement when grouped and just as big a statement when used in a mixed container. It even blooms with small white flowers held above the foliage on thin stems starting in early May and continuing throughout June.

Heucherella hybrid 'Fun and Games® Red Rover'

Hosta 'Beach Boy' Beach Boy Hosta

NEW! Charming smaller hosta with leaves of brilliant gold with blue-green edges. Lavender flowers appear on scapes above the foliage. Prefers shady locations and moist soil, great addition to shady beds, can also be used in containers. Vigorous and slug resistant.

☀️ 🌿 🦋 🦋 H: 14-16" W: 24-28" Zones: 3-8

Hosta 'Blue Vision' Blue Vision Hosta

NEW! Large cup shaped leaves of 'Blue Vision' will dominate the shaded landscape with its heavily crinkled and ribbed foliage, truly is more blue than green. White flowers bloom on long stems above the foliage in summer attracting butterflies. Mix with other hostas or shade loving perennials in well-drained soils.

☀️ 🌿 🦋 🦋 H: 16-20" W: 30-36" Zones: 3-8

Hosta 'Abiqua Drinking Gourd'

Hosta 'Dancing Queen' Dancing Queen Plantain Lily

NEW! Pointed, ovate, ribbed brilliant gold foliage emerges in spring and matures to light yellow with summer heat. Thick flower stalks rise above the foliage in summer bearing light lavender bells in July and August. Easy to grow. Perfect for grouping in the landscape. Thrives in partial shade. Attracts hummingbirds.

☀️ 🌿 🦋 🦋 H: 15-18" W: 18-24" Zones: 3-9

Hosta 'Atlantis'

PERENNIAL:

Hosta 'Fire And Ice' to Hosta 'Blue Mouse Ears'

Hosta 'Fire And Ice' *Fire and Ice Hosta*

Brighten up your garden with this sport of Hosta 'Patriot' that features dense, spreading form and full waxy textured leaves that are pure white in the center bordered by deep, dark green leaf edges. The color contrast is outstanding and its size is such that it rarely overwhelms the garden. In fact, even in a small garden, you can magnify the effect of its eye catching foliage by grouping 'Fire and Ice' to produce illumination without the aid of low voltage lights! 'Fire and Ice' adds even more interest in mid-July when flower stalks rise above the foliage producing light lavender, lightly fragrant flowers. Plant this in partial to full shade in moist, well-drained soil for optimum performance.

☀️ 🌞 🌿 🦋 H: 8-10" W: 30-36" Zones: 3-8

Plants
that
Work

Hosta 'June Spirit' *June Spirit Hosta*

NEW! This sport of 'June Fever' is full of hosta spirit! Like the entire 'Halcyon' family, this plant shows excellent substance, season-long good looks, and an all-around good garden presence. Lacking the milky waxy of the rest of the family, the chartreuse foliage is glossy and edged by a broad swath of deep green. Hosta 'June Spirit' grows happily in part sun, which turns the leaf centers gold. Forms a slick mound about 14" high and 30" across that blooms in mid summer with fertile lavender flowers on short scapes.

☀️ 🌞 🌿 🦋 H: 14-20" W: 24-30" Zones: 3-9

Plants
that
Work

Hosta 'Moon Split' *Moon Split Hosta*

NEW! Brilliant for darker, shadier landscape spots, this tough, mounded selection features rounded, gold foliage with streak of dark green in the center for contrast. Neat and compact, it is the perfect plant for grouping or to use alone in smaller spaces. Flower stalks rise above the foliage in summer bearing lavender bell-like flowers

☀️ 🌞 🌿 🦋 H: 15-18" W: 18-21" Zones: 3-8

Plants
that
Work

Hosta 'Stained Glass' *Stained Glass Hosta*

'Stained Glass' shows why it is so highly acclaimed among Hosta lovers with foliage that is brilliant gold with a wide, dark green margin, a unique reversal of the usual variegated Hosta. The leaves are shiny and the golden centers darken during the season as they form a dense, wide spreading mound that will really dominate and brighten a shady area of the landscape. Fragrant, pale lavender flowers are borne on 30-36" scapes in August and will fill the garden with sweet scent. This selection is aptly named for the glowing gold leaf center and prominent veining that gives the appearance of stained glass and is an addition to the garden that could almost be considered a religious experience! 2006 Hosta of the Year.

☀️ 🌞 🌿 🦋 H: 15-20" W: 30-40" Zones: 4-8

Plants
that
Work

Hosta Blue Angel *Blue Angel Hosta*

A mature clump of Hosta 'Blue Angel' forms an impressive mound 4ft high and twice as wide with heavily textured, blue-gray leaves four times the size of a man's hand. Abundant clusters of white flowers on 4-5ft stems complement the foliage. Slow to get going but more than worth the wait to see what it can do. Plant in moist, well-drained soil, but will tolerate dry soil. Excellent slug resistance.

☀️ 🌞 🌿 🦋 H: 30-36" W: 40-48" Zones: 5-9

Hosta Blue Mouse Ears *Blue Mouse Ears Hosta*

An award winning and fun hosta, 'Blue Mouse Ears' adds a bit of whimsy to any shade garden. Its cute, heart shaped leaves rarely reach over 3 inches long and each clump makes a perfectly symmetrical mound of extremely thick, almost rubbery blue leaves, each one having a sliver of white around the edge. Spikes of lavender blooms pop up on long stems held above the foliage in late July. The stature and excellent garden performance of 'Blue Mouse Ears' make it a wonderful addition for mixed containers, rock gardens, and really any area in partial to full shade where colorful foliage and great dependability are needed. 'Blue Mouse Ears' is one of the most popular Hosta for grouping at the front of shade gardens and is one of the most slug resistant varieties available.

☀️ 🌞 🌿 🦋 H: 6-8" Zones: 5-8

PERENNIAL:

Hosta 'Blueberry Muffin' to Hosta 'Neptune' PP19674

Hosta **Blueberry Muffin** *Blueberry Muffin* Hosta

NEW! A nice blue hosta with a unique puckering on the large blue leaves. As summer progresses the leaves slowly develop a greenish tint. Butterflies and hummingbirds flock to the lavender flowers that float above in the foliage in July. Plant in the front of a border but give it a large area to spread out its blue foliage. Great for shaded woodland gardens mixed with Asilbe and ferns.

☀️ 🌞 🌿 🦋 H: 12-14" W: 30-36" Zones: 4-7

Hosta **Dream Weaver** *Dream Weaver* Hosta

NEW! Large round leaves are blue with a white center streak. Heavily corrugated leaves add a nice texture and contrast to the shaded garden. White flowers bloom in summer attracting butterflies and rising well above the colorful foliage.

☀️ 🌞 🌿 🦋 H: 18-26" W: 24-30" Zones: 3-9

Hosta **Enchiladas** *Enchiladas* Plantain Lily

NEW! Slightly rippled, rounded, dark green foliage is brightened with golden variegation. From mid-July to August, enjoy the superb fragrance of the pale lavender blooms. Perfect for borders or specimens in the dappled sun landscape. Hummingbirds adore the nectar-filled blooms! Flowers are sterile and won't set seed.

☀️ 🌞 🌿 🦋 H: 18-24" W: 28-32" Zones: 3-8

Hosta **First Frost** *First Frost* Hosta

NEW! Brilliant is the only way to describe this vibrant blue and yellow hosta. 'First Frost' is wider than it is tall and makes a dramatic statement in the shaded garden. Large heart-shaped leaves are a bright blue edged in a creamy yellow to white. Tall lavender flower scapes rise above the foliage in summer. Great for shady beds and borders even containers!

☀️ 🌞 🌿 🦋 H: 12-16" W: 30-36" Zones: 3-9

Hosta **Fortunei Aureo-Marginata** *Aureo-marginata* Hosta

Dependable and distinctive, you'll love this selection's long, lance-like foliage edged with golden yellow as it forms a tight mound in the shady landscape. Flower spikes rise above the foliage and are topped with lilac-colored flowers that open in late July.

☀️ 🌞 🌿 🦋 H: 20-24" W: 24-30" Zones: 4-8

Hosta **Fragrant Bouquet** *Fragrant Bouquet* Hosta

Hosta 'Shadowland™ Autumn Frost'

Hosta hybrid Shadowland® Empress Wu *Shadowland® Empress Wu Hosta*

The Hosta world is filled with impressive plants but all pale in size when compared to 'Empress Wu'. Named in honor of the only female empress of China, 'Empress Wu' certainly carries an imperial presence into the garden with spectacular size in both height and width that makes it a true garden specimen. Leaves emerge deep green with a blue tinge and heavily corrugated and seem to just keep on growing until they reach an unprecedented 18" across! These massive leaves form an equally massive mound that fills space beautifully in partial to full shade locations. It is truly a dominant perennial but, with its great color and texture, it is a benign presence in the garden as it works well with and provides a perfect backdrop for other foliage and flower colors. Plant one or more if you dare, give it room to grow and get ready to be awestruck! Proven Winners.

Hosta tardiana Halycon *Halycon Hosta*

This award winning Hosta forms a dense mound of flat, spear shaped, silvery blue-green leaves that retain their blue color longer than other blue varieties. Pale, lilac-blue, bell shaped flowers rise above the foliage in August attracting butterflies and hummingbirds to the shaded garden. A slower growing hosta that takes several years to reach its mature size, its a dependable and versatile perennial requiring little and giving excellent texture and flowers to the shaded garden. Because of its smaller stature, it is the perfect Hosta for massing in the front of the garden, spotting in small, shady landscape spots or using as part of a stunning, mixed perennial and annual container for a shady deck or patio. American Hosta Society Distinguished Merit Hosta Award (1987).

☀️ 🌟 🌿 🦋 H: 15-18" W: 20-24" Zones: 3-8

Iris

Iris cristata *Dwarf Crested Iris*

This partial shade to full shade loving woodland native is a cute little charmer with pale to medium green, sword-like, upright foliage that spreads by thick rhizomes and can densely populate an area with ideal growing conditions. With its pale blue, sizable flower with golden falls, this April to early May bloomer can really jump start the spring shade garden and can look like a magical carpet of blue color in big, established stands. Besides providing such a charming spring bloom, this American Beauties classic provides invaluable cover to small woodland wildlife throughout the season. American Beauties Native Plants®.

☀️ H: 6-9" W: 10-12" Zones: 3-8

Lamium

Lamium Orchid Frost *Orchid Frost Lamium*

Blue-green leaves have shining silver centers. The abundant purple blooms add just enough color to make this plant subtle yet spectacular! Blooms April through June. A great plant for the shade!

☀️ H: 4-6" Zones: 3-8

Hosta tardiana 'Halycon'

PERENNIAL:

Lamium 'Pink Pewter' to Onoclea sensibilis

Lamium Pink Pewter *Pink Pewter Spotted Deadnettle*

One of the best choices for a tough yet showy perennial groundcover. This selection forms a spreading patch of small silver leaves with a narrow green edge. Pink flowers rise above the silver foliage from late spring all the way into the cooler fall weather! Ideal for use in containers, borders, edging or as showy groundcover. 'Pink Pewter' quickly spreads to form a colorful groundcover it prefers moist, well-drained soil in partial shade. Just be careful with over watering as it can cause root rot.

☀ H: 6-12" W: 12-24" Zones: 2-8

Lamium maculata Red Nancy *Red Nancy Deadnettle*

Another great selection of Lamium with the attributes that make you love this group of plants: its ability to cover ground in shady or partially shaded areas, its easy care nature, and its colorful look from foliage and bloom that makes it look so much more refined than your normal groundcover. Its foliage is superb with small silver leaves edged in green that form a tight mat and creep along the ground. Short spikes of bud poke above the emerging foliage in April to reveal reddish-pink bloom that lasts well into June to spice up the look of this plant further. Jeepers Creepers.

☀ H: 4-6" W: 15-18" Zones: 3-8

Lamium maculatum Pink Chablis *Pink Chablis Dead Nettle*

Find a shady area or window box in a prominent place because you are going to want to find lots of spots for this superb perennial that offers so much while asking so little. 'Pink Chablis', first and foremost, offers outstanding foliage and form with trailing stems holding shimmering foliage of silver backed with green tightly against them to produce a luminescent mat that tops itself throughout the spring and summer with small, loose spikes of cotton candy pink colored flowers. What a show 'Pink Chablis' provides as a groundcover or as a trailing container plant with so little care needed. 'Pink Chablis' will perform beautifully in full sun or full shade, is drought resistant, deer resistant and incredibly colorful. Plant lots of these in your landscape then pat yourself on the back for making such a sweet, colorful choice! Proven Winners.

☀ H: 6-8" W: 12-15" Zones: 4-8

Lamium maculatum White Nancy *White Nancy Deadnettle*

From a distance this spreading beauty looks almost pure white, a color that will definitely get your attention especially in a shady spot. As you come closer to take a look you'll see that it is actually a series of variegated silvery-white leaves with green margins grouped tightly along trailing stems. 'White Nancy' forms a perfectly beautiful groundcover that spreads by stolons and is aggressive while not being invasive. It's one of the easiest, most rewarding long season color plants for partial to full shade you can grow and even has a pleasing, mint-like, pure white bloom that first appears in late May and early June. It tolerate virtually any well-drained soil and will take a shearing if you feel it is misshapen or growing too aggressively, and come back even stronger and more beautiful than before. 'White Nancy' is extremely hardy and deer resistant so feel free to plant it in large groups or even in mixed containers for a shady patio or deck that could use its great color and great vigor.

☀ H: 6-8" W: 12-24" Zones: 3-8

Onoclea

Onoclea sensibilis *Sensitive Fern*

Commonly called Sensitive Fern because its green vegetative fronds are the first to show damage from frost, this woodland delight offers strongly upright vegetative fronds that are 2-4' long and finely divided to go along with a pleasing leathery look that, in combination with their light green color, will light up a shaded area. This fern also offers contrasting fertile fronds that appear more woody in nature with unique bead-like segments that add contrasting brown color in the late summer and hold that color and structure through the winter well after the vegetative fronds have disappeared for the season. Sensitive Fern is an easy growing winner for a moist, shady area and it naturalizes well in a landscape spot that is hard fill with other selections while offering subtle color and great texture that you'll love.

☀ H: 3-4' W: 3-4' Zones: 4-8

PERENNIAL:

Osmunda regalis to *Phlox stolonifera* 'Sherwood Purple'

Osmunda

Osmunda regalis *Royal Fern*

Combining an aggressive growing nature and great looks, this native fern is a 'must have' plant for the shady areas of your landscape. Big, wide fronds rise out of the ground in the early spring, soon showing off their big, widely separated leaflets that almost give this fern the look of a plant from the pea family. While fronds usually rise a considerable 2-3' in height they can reach 5 or 6 feet in areas with constant moisture content, giving it a size and form that allows it to lord over the surrounding shade landscape. Royal fern is deciduous with fronds turning a gold to golden brown color before disappearing in the fall. Royal is an easy care winner for any tough shade landscape and will fill in these areas with grace, charm and efficiency.

☀ H: 2-3' W: 2-3' Zones: 3-8

Penstemon

Penstemon Purple Riding Hood *PP#23,067 Purple Riding Hood Beardstongue*

Beardstongue is a native North American wildflower and so it's used to a care-free life, but don't let the word 'Native' scare you away for a lack of a flower color punch! 'Purple Riding Hood' boasts trumpet-shaped flowers that are a beautifully deep, true purple amidst lush, glossy green foliage. Stunning planted in masses, in borders or naturalizing and feeding our pollinators no matter where they are. Excellent in containers spilling over the pot or adding that 'thrill' in a mixed pot.

☀ 🌱 🍷 🍷 🍷 🍷 🍷 H: 24-30" W: 18-24" Zones: 5-8

Phlox

Phlox divaricata Blue Moon *Blue Moon Woodland Phlox*

Sometimes gardeners think that the only good plant is the newest plant from the hottest breeder. 'Blue Moon', a superb native plant discovered by Bill Cullina at the New England Wildflower society, shows you that tremendous plants can come from anywhere. 'Blue Moon' emerges early in the season to form a loose, tumbling, trailing mass that covers itself with buds by early April and bloom by late April. And what a bloom!! Profuse numbers of deep violet-blue flowers conceal the foliage they are so numerous creating a cloud of color well into May. Add in this plant's tremendous flower scent and the fact that 'Blue Moon' is absolutely perfect for semi-shaded and shaded areas and you have a tough yet tender early spring bloomer that will charm you every year. American Beauties Native Plants®.

☀ H: 10-12" W: 12-15" Zones: 4-8

Phlox stolonifera Sherwood Purple *Sherwood Purple Creeping Phlox*

How can you go wrong with a plant that grows in shade, blooms like crazy in early to mid spring and is one of the most low maintenance plants you can find? You can't go wrong with a plant like 'Sherwood Purple' that flows and tumbles over the contour of the land with prostrate branches that are tightly packed with deep green foliage. Mid to late April transforms this plant from a great groundcover to a fantastic ocean of color with deep purple star-shaped flowers covering the branches and flower over the landscape. Native insects are thrilled by this early nectar source and you'll be thrilled to know that this plant is great to plant in groups in the shade and works so well planted amongst other natives! American Beauties Native Plants®.

H: 16-20" W: 10-21" Zones: 3-9

Polystichum

Polystichum acrostichoides *Christmas Fern*

Adaptable and evergreen, this native tolerates such a wide range of landscape conditions that it is a must for the American Beauties garden. While it will thrive in very moist circumstances, Christmas Fern is a godsend to dry, shady spots as its low profile, wide spreading, deep glossy green fronds will grow in these harsh conditions and still look lush. A mass planting of this fern makes a strong, beautiful landscape statement but, whether planted in groups or alone, it still provides great year round cover to numerous valuable landscape critters and constant greenery to the garden, even in winter. American Beauties Native Plants®.

H: 18-24" W: 30-36" Zones: 3-8

Polystichum acrostichoides

Polystichum polyblepharum *Tassel Fern*

NEW! Glossy, evergreen leaves are shiny and nearly glow in the shaded landscape. Polyblepharum means "many eyelashes" in reference to the hairy fiddleheads and petioles. As the fiddleheads unfurl they flip backwards and resemble tassels, hence the common name of Tassel Fern. An excellent addition to the mixed woodland border or wild gardens its graceful vase shaped clump slowly spreads. Deer and rabbit resistant.

Pulmonaria

Pulmonaria Majeste *Majeste Lungwort*

For silver that will bring shine to shade, look to the lance-shaped leaves of 'Majeste'. Although the new growth is green, it quickly turns to silver and is topped in early spring by bell-shaped, blue flowers that age to pink. Plants spread slowly to form an attractive ground cover. Exquisite as an underplanting for Ferns and Hostas. Choose a spot that stays moist (not wet) and has soil rich in organic matter.

H: 10-12" W: 12-18" Zones: 4-10

Pulmonaria 'Majeste'

PERENNIAL:

Pulmonaria 'Opal' to *Pulmonaria long.* 'Bertram Anderson'

Pulmonaria Opal *Opal Lungwort*

This plant has many great features once you get beyond the common name! It is an under used, tremendous plant that adds foliage and flowering interest all season in the garden. Rounded mounds of foliage attractively splashed with large sparkling silver flecks are unusual and a topic of many admiring questions! The flowers are great for the spring garden, arising in mid-April and lasting into May. The flowers cover the foliage and open a pale, shining blue and mature to paler hues of blue. Flowers, foliage, and its shade loving nature make this plant a "must have."

☀️ 🌞 🌿 H: 12-14" W: 12-18" Zones: 3-8

Pulmonaria Raspberry Splash *Raspberry Splash Lungwort*

Your shady garden spots will love the snappy color and style this early blooming perennial adds. Its foliage is a great, season long attribute that emerges in early April deep green with distinct, nearly luminous whitish-silver spots and forms a dense basal mound of leaves. Flower stalks rise out of this silver spotted mass and open to reveal strings of raspberry colored flowers that continue to bloom through the end of May adding a flourish to already showy leaves. 'Raspberry Splash' is best planted in shade or partial shade with moist, well-drained soil and is very impressive when grouped at the front of a garden.

☀️ 🌞 🌿 H: 10-12" W: 12-15" Zones: 5-8

Pulmonaria Trevi Fountain *Trevi Fountain Lungwort*

Hosta may be the king of mid spring to fall shade foliage plants but Pulmonaria make a strong case for being the ruler of the early to mid spring garden for foliage and will hold their own in the shade garden even after those Hosta unfurl. 'Trevi Fountain' exhibits all the gifts that make Pulmonaria so valuable in the shade landscape with long, strap-like foliage that is deep green and heavily spotted with irregular silver blotches. Unlike Hosta, 'Trevi Fountain' doesn't overpower you with massive size and texture, it soothes you with its cool foliage, finer texture and ability to fill a much lower, spreading space in the garden. A bigger bonus may be its restrained yet still spectacular spring bloom. Like all Pulmonaria, 'Trevi Fountain' sends out a short flower stalk that stands just above its foliage as it emerges in early to mid April bearing buds that soon open to considerably sized, funnel shaped, cobalt blue flowers that stay in bloom from mid April through late May. 'Trevi Fountain' is perfect for grouping, thrives in partial sun to full shade and wants deep, rich, moist soils to put on its tasteful yet significant show.

☀️ 🌞 🌿 H: 10-12" W: 18-24" Zones: 4-8

Pulmonaria Twinkle Toes *PPAF Twinkle Toes Lungwort*

NEW! This enticing shade perennial will make you want to dance with its striking blooms and unique foliage. Starting in mid-spring, dainty light periwinkle blue flowers cover a low, mounded habit. After the flowers fade, you can enjoy its dark green leaves that twinkle with silver. This underused and under appreciated beauty will thrive in moist shade to part shade, adding bright spring color to even the darkest garden areas. Plants That Work.

☀️ 🌞 🌿 H: 12-14" W: 16-18" Zones: 3-8

Pulmonaria longifolia *Bertram Anderson Bethlehem Sage Bertram Anderson Bertram Anderson Longleaf Lungwort*

NEW! Brighten up any shade garden with this early blooming perennial that is as renowned for its foliage as its bloom. Leaves emerge from the ground as the weather warms in late March forming a mound of long, narrow, deep green, spade-shaped foliage offset by an array of white spots that make the leaves look like they just have emerged from a passing paint shower! The foliage serves as the backdrop for stems of small, deep blue to pink, bell shaped flowers that rise above the mound in late April and continue through May. 'Bertram Anderson' is one of those indispensable plants for a shade garden that thrive where other plants falter...it looks fantastic in groups at the front of any garden and will give you months of foliage viewing pleasure. While many Lungworts are powdery mildew prone, this is one of the most resistant giving you even more reason to enjoy them!

☀️ 🌞 🌿 H: 8-12" W: 16-18" Zones: 3-8

☀️ 🌿 🌱 H: 1-2" W: 12-15" Zones: 4-8

Stylophorum

Stylophorum diphyllum *Celandine Poppy*

Create an early season sensation in your garden with this very dependable, very showy bloomer. Heavily lobed, deep green, silver backed foliage emerges early in the spring to form a wide spreading mat of foliage. Plants are quickly topped by a continuing succession of flower buds that begin to open in mid to late April, showing off clusters of bright yellow flowers that will continue unabated until early June. While also being a shade lover, Celandine Poppy loves moisture and is at home along ponds and stream beds where it satisfies its hankering for moist feet. This plant provides lots of landscape cover for native critters and is very showy when grouped, in fact, it so aggressively seeds itself you may want to give it some room and look to keep it contained for your optimum enjoyment. American Beauties Native Plants®.

☀️ 🌿 🌱 H: 12-18" W: 12-15" Zones: 4-8

Thelypteris

Thelypteris decursive-pinnata *Japanese Beech Fern*

Majestic, shiny, bright green fronds with interesting form and texture is ideal of mass plantings or as specimen patio container. Easily grown in rich, evenly moist, well-drained soil in shade or dappled sun. Tolerant of a wide range of soil conditions, including somewhat drier conditions than many other ferns.

☀️ 🌿 🌱 H: 24-28" W: 24-36" Zones: 5-8

Vinca

Vinca minor Alba *White Flowering Periwinkle*

Dependability is this tough groundcover's middle name, but don't think just because it so tolerant that it lacks anything in the beauty department! You'll love its deep green foliage on long stems that bunch together to form a flowing thicket-like mat which provides a perfect backdrop for waves of single, pure white flowers that bloom in early May and keep appearing intermittently well into the summer. Like all Vinca, 'Alba' loves a shady spot and is remarkably effective at growing, spreading and holding the soil in spots where it seems as if you can't get anything to grow. Its carefree nature and great looks make it a must for any difficult shade spot in your landscape. Jeepers Creepers.

☀️ 🌿 H: 6-10" W: 15-18" Zones: 4-8

Vinca minor 'Alba'

Vinca minor Bowles *Bowles Periwinkle*

A superb groundcover for part to full shade, this plant displays a rich green shiny foliage year-round and a great texture that is a definite landscape plus. Loaded with blue flowers in the spring, this plant prefers a moist but well-drained soil.

☀️ 🌿 H: 4-6" W: 2-3' Zones: 4-8

PERENNIAL:

Vinca minor 'Darts Blue' to Woodwardia virginica

Vinca minor Darts Blue *Dark Blue Flowering Periwinkle*

Dreamy, dark blue flowers with a hint of lavender will make this dependable groundcover come alive with luscious color starting in early May and continuing intermittently well into the summer months. Its deep bloom brings out the best in any shaded area and makes a subtle yet superb contrast with its lustrous, deep green foliage that lines up tightly along thin pendulous stems. 'Dark Blue' is a gardeners' dream for shady, tough areas where it seems nothing wants to grow. 'Dark Blue' thrives in these spots and is one of the best plants anywhere to help prevent erosion and hold soil. Jeepers Creepers.
