Record Retention Training Webinar:

After some technical difficulties, the Council viewed the webinar by Brian Tipton detailing and explaining record keeping standards under the Uniform Grants Guidance.

Ms. Quinn passed out a summary of the sections of several manuals regarding SLPT recording keeping. It is important to create rules for comprehensive record keeping policy. Council needs to set the rules. She asked the Council to think about the following. What are they doing? How are they doing it? It needs modernization to include scanning of records. They need to determine what to dispose of, what should never be disposed of like historical documents, how the documents should be stored, i.e. in binders, in plastic in binders, in a file wrapped in a rubber band for three years. The rules should follow the rules of the Uniform Grants Guidance. Then there are the special types of scientific records that Ms. Youmans has. Ms. Quinn feels the lack of an updated record keeping is a weakness along with the outdated Inventory. These two things are Ms. Quinn’s high priority. The files and documents need to be organized.
