

15 minute COVID-19 Rapid Test Kits

Fedhealth has teamed up with **Anytime Covid Test, LLC** to provide agencies, businesses, schools, groups and individuals with an affordable pre-screening test for **COVID-19 antibodies** that gives confidential results in **15 minutes or less** in the privacy of your workplace or home.

This FDA Authorized test helps determine whether you have been exposed to the virus within the past 4 to 24 days. The rapid test cassette reliably identifies IgG and IgM antibodies specific to SARS-CoV-2 in a sample of **blood** drawn with a finger prick in **11 to 15 minutes** without exposing people to this or other viruses with an unnecessary trip to the lab, doctors office or field visit.

When you are ready to take the test you will interface directly with an online virtual clinic. In the event you test positive, a doctor will consult with you virtually at no additional charge.

Anytime Covid Test kit with 1 full month of Telemedicine is normally **\$49.50** but now is **only \$15** (sold in **3-packs for \$44.55**).

Kits can be [purchased](#) in 3-pack sets so agencies, schools and business owners have them available for staff, students, customers or clients, and families have them on-hand for peace of mind.

Learn how to order COVID-19 rapid kits for your [workplace or home](#) ... and proceeds benefit [U.S. First Responders Association](#).

And, if you (or others) are interested in **on-going full service telemedicine** for your family (or staff), please [learn more here](#) or email janet@fedhealth.net or call **520.907.2153** to discuss your needs.
