Bleak New Estimates in Drug Epidemic: A Record 72,000 Overdose Deaths in 2017

- Fentanyl is a big culprit, but there are also encouraging signs from states that have prioritized public health campaigns and addiction treatment.
- By Margot Sanger-Katz
- Aug. 15, 2018

Synthetic Opioids Are Driving Up the Overdose Rate

Overdose deaths in thousands in preceding 12 months
What is Needed at the Federal Level?

HHS FIVE-POINT OPIOID STRATEGY

1. Strengthening public health surveillance
2. Advancing the practice of pain management
3. Improving access to treatment and recovery services
4. Targeting availability and distribution of overdose-reversing drugs
5. Supporting cutting-edge research

Learn About Opioid Use Disorder!

NIDA funded Course Modules Online*
1. Understanding Addiction
2. Identification, Counseling, and Treatment of Opioid Use Disorder
3. Collaborative Approaches to Management of Opioid Use Disorder
