

Mobile VC/Presentation Solution

Mobile VC/Presentation Solution

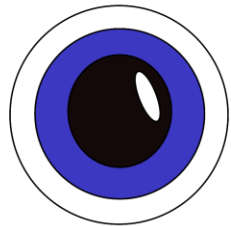

AV/VC One is a simple and elegant support system for large format displays, offering easy access to the screen for interactive sessions.

The column structure features internal equipment storage and concealed cable management with a lockable back panel for a secure and tidy installation.

The system is typically installed with female connectors for HDMI and VGA + Audio for local source access. Further functionality can be provided with the addition of a wireless presentation system such as the AirMedia from Crestron.

Features

- High Quality
- Perfect for client facing applications
- Rigid and stable construction
- No unsightly cables on show
- Rack space for PC
- Space for VC Codec & camera
- Dual screen version
- Available in White or Black
