

DISCLAIMERS

The College and Career Readiness Standards document below contains links to other websites, all of which are revised from time to time. *Laurens County Adult Education is neither responsible for the content of these links nor the current availability of the links.*

Some of the online links may take the teacher to a Common Core website that offers free worksheets. The teacher should always vet the worksheet before assigning it to students. Anyone who follows the news or social media has seen ridiculous Common Core math problems on worksheets that elementary school teachers have sent home with students for homework. Examine all worksheets closely to see that they will be effective for adult students before you decide to print and use them.

These documents are not perfect. They are merely intended to give the teacher a starting point for each standard.

Please send any corrections that need to be addressed to Anita Wilson at awilson@laurens55.org.

Constructive feedback is also welcomed.

Using the College and Career Readiness Standards Documents

1. Every document is formatted so that each standard is presented on exactly one page. Because of this formatting, the print size will differ from page to page depending on the length of the standard or the number of print or online resources aligned with the standard. Font sizes will range from 9 to 12, with most being either 10 or 11.
2. The list of print resources is merely a starting point. Included are the most commonly used books here at Laurens County Adult Education for the 2014 series GED® tests. Other resources include the Contemporary books, the Steck-Vaughn GED books, the Number Power series, etc., that were used for the 2002 series GED® tests. All of the Laurens County Adult Education sites will have some, but perhaps not all, of those additional resources since books have disappeared over the years and the older books have not been replaced. Some of the print resources are closely aligned, but many may be loosely aligned.
3. The list of online resources is also merely a starting point. As with print resources, some online resources are better than others. The teacher should always vet a website before sending students to that website. Khan Academy (Mathematics) and Learnzillion often include videos to explain the standard. Note that the links included in each document will take the teacher to a “home page” for each standard. Khan Academy, for example, may have several links under each standard, and when the teacher clicks on each link, the teacher will find several lessons to address the standard. Feel free to explore each website to determine lessons that best suit individual students.
4. The reading level for some of the print resources may be above the reading level of some of the students in your class who are on the Low Intermediate Level. The teacher may find the print resources useful for generating ideas for lessons for weaker readers.

CCR Level C Reading (Low Intermediate ABE)

CCR Anchor 1: Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific evidence when writing or speaking to support conclusions drawn from the text. *(Apply this standard to texts of appropriate complexity as outlined by Standard 10. Standard 10 defines a staircase of increasing text complexity that rises from beginning reading to the college and career readiness level.)*

Standard RI/RL.4.1 Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.
