

2019 Chapter Meeting

An Educational Presentation

Getting the Most Out of Your On-Site Sewage Treatment Plant

Thursday, November 14, 2019
6:00 - 8:00 pm
Capital One Bank - Corporate Offices
1307 Walt Whitman Road
Melville, New York

Generally, communities with their own on-site Sewage Treatment Plant (STP) view the facility as a necessary evil. This often leads to a lack of attention and/or a lack of funding for this necessity at your community. Long Island only has one source of clean drinking water, the aquifers, and it is important that these facilities be operated in a way that continues to protect that drinking water and keep it clean and drinkable for generations. But how do we do that and still stay within our budget?

What are some of the rules and regulations that govern your on-site STP? What are some of the required preventative maintenance measures? Are there any regulations that you are currently not following and how will that impact your community? How can you maximize your spending power to minimize the impact to your budget?

This month's speaker, Matthew P. Scheiner, P.E. of Robinson & Muller Engineers, P.C., will answer these questions and provide a brief overview of the STP requirements. There will also be time for your specific questions.

No fee for Condo/HOA Volunteer Board members & Community Board Resident

Business Members \$20 Non-Member Fee \$40

Refreshments served. Registration required. Space is limited. Photo id required.

Please R.S.V.P. by Friday – November 11th to Christine M. Majid, Executive Director CAI – Long Island
