

With a SOBO padlock, you can be assured of the high security and durability that these locks provide. They have a solid weight, and a smooth opening or locking motion, which means that there is no spring loaded parts to bind or wear out with time. These locks grant very little access for bolt cutters or saws when used with a lock box. They feature a hardened steel, chrome plated bolt that rotates freely.

FEATURES:

- Hardened steel & chrome plated.
- Freely rotating shackle resists cutting
- D-lock padlock style
- Triple chrome plated to resist corrosion
- No spring loaded parts to wear out
- Comes with 4 keys per lock
- 60mm or 80mm styles available
- Keyed-Different or Keyed-Alike locks available
