Re: 2025 Lakefront Weed Harvesting

The Summer Village of Silver Sands is included within a single permit held by LIAMS (Lake Isle Aquatic Management Society) on behalf of all of its members for the removal of aquatic vegetation. The permit allows one four-meter wide cut on one side of a dock or pier, with a four-meter channel out to open water. The removal of bulrushes (cattails) or reeds is NOT permitted at any time and all cut vegetation must be removed immediately away from the lake area so that no nutrients from the cut material can leach back into the water. LIAMS has a contracted weed harvester that cuts, removes and trucks away the vegetation from the lake in accordance with their weed harvesting permit.

As a lakefront property owner or the owner of an approved seasonal dock in Silver Sands, you have the option to be part of the cut that will take place between the 3rd and 4th weeks in July (estimated timeframe as this is weather dependent). The cost of each harvested area is the responsibility of the landowner or dock owner requesting the harvest be done.

The cost of the 2025 cut will be \$300.00 (\$290.00 for the cut and \$10.00 for the annual LIAMS membership (*required*)).

See details on reverse for registration and payment information.
