

Steve Fleming joined the Federal Reserve System in 2005, and spent 8 years as an IT Auditor developing intimate knowledge of National IT systems, eventually leading the System-wide Information Security Audit for three consecutive years. In 2013, Steve moved to the newly created Audit Solutions and Innovation (ASI) group, where he has been instrumental in enhancing Audit's use of automated solutions, business intelligence, and analytics. Prior to joining Federal Reserve, Steve worked for over 12 years in various information technology roles, including system administration, commercial and industrial software design, networking, and security.
