

Woodside Streetscape Project Summary

The City of Fountain Inn and the South Carolina Department of Transportation will provide streetscape improvements within the City through the Woodside Connector Streetscape Improvements project. This project consists of 0.86 miles of streetscape improvements along Diamond Tip Boulevard, Woodside Avenue, and Jones Street and will create a pedestrian connection between several points of interest adjacent to downtown Fountain Inn. Beginning at the recently improved Main Street, Farmer's Market, and History Center at the northeast end of the project, the route will also connect to Woodside Park, which is in the process of undergoing a major renovation, and the Woodside Mill Village before ending at Fairview Street Park. Improvements will consist of a new eight-foot-wide sidewalk, landscaping, decorative street lighting, signage, and street drainage improvements. For questions relating to this project, please contact Shawn Bell with the City of Fountain Inn.
