**Subject:** Changes to LDI Website Relative to the Insurance Data Security Law

The purpose of this email is to inform you of updates made to the LDI website in response to the enactment of the Insurance Data Security Law (La. R.S. 22:2501 et seq.). Below you will find a brief explanation of the changes.

The LDI has added a page to its website at [ldi.la.gov/cybersecurity](http://ldi.la.gov/cybersecurity) to provide information on reporting cybersecurity events as required by the Insurance Data Security Law, which took effect August 1, 2020. The law requires that all insurance licensees report to the Commissioner of Insurance all cybersecurity events involving nonpublic information of Louisiana consumers in accordance with La. R.S. 22:2506.

The website has links to the following:

- Insurance Data Security Law as passed by the legislature (Act 283)
- Reporting a Cybersecurity Event Flowchart, which provides a graphic aid to use with the statute to determine when to report
- Report a Cybersecurity Event Form, for use in notifying the Commissioner of Insurance in a manner consistent with the statutory requirements

The definitions of "licensee," "cybersecurity event," "nonpublic information," "consumer," and other terms used in the law are in La. R.S. 22:2503.
