

QUARTERLY NEWS & NOTES

ENGINEERING

D&B is proud to announce our new partnership with Yanmar, manufacturer of gas-fired VRF units. Eliminating the need for costly electrical upgrades (single-phase up to 14 tons), Yanmar's gas-fired VRF equipment can meet the HVAC needs for many D&B customers in the NJ/NY metro area. Additionally, Yanmar's gas-fired VRF pairs with Daikin controls, evaporators and components,

D&B ON THE JOB

D&B Engineering supplied (4) four Daikin 500TN chillers for Dayton Avenue Elementary School in Passaic, NJ. D&B was able to meet LEED and NJ Smart Start efficiency requirements with low maintenance air-cooled machines in lieu of typical water-cooled machines on buildings of this size (448,000 sq.ft.)! Utilizing Daikin's Variable Speed Screw Compressors with Variable Refrigerant Flow (VRF) technology and refrigerant economizers, D&B was able to achieve ultra-high efficiency. Daikin also earned an additional LEED point by reducing the refrigerant volume with micro-channel condenser coils.

D&B PARTS

Did you know that D&B Parts carries all of the most popular HVAC tools? From leak detectors to scales and even the best-selling Klein tool kits (pictured on right), D&B Parts supplies the right parts AND tools to get the job done!

MANUFACTURER NEWS

D&B Engineering is excited to introduce Daikin's NEW Rebel Applied™ rooftop unit. This game-changing equipment is 37% shorter in length and 30% lighter than legacy rooftop units all while providing unmatched efficiency with EERs exceeding 11.0 and IEERs up to 17.0. Rebel Applied™ is also the only rooftop HVAC system to meet ASHRAE's standard for leading performance in airflow design.
