

Vision Programming Specialists

Stage Glass for Keyence IM-6000 & 7000 Series

Currently available in GE124
scratch resistant fused quartz.

About us:

Vision Programming Specialists
provides programming services
remotely or on site for Keyence
IM-6000 and IM-7000 series
machines.

Keyence Fixturing:

Standard & custom fixturing
solutions for IM series machines.
Perfect for applications that
require multi-part fixturing to
increase throughput and
accuracy.

Benefits

We keep your quality people
focused on the task at hand. You
save money & time instead of
constantly training and retraining
new employees. Avoid the
hassles of hiring, training and
eliminate the burden & benefits
that comes with new hires.
If you purchase a new machine,
you are able to start checking
parts while your people are
learning how to program.
You are able to see your ROI
immediately while you are getting
up to speed.

Replacing the glass on
your Keyence IM-6000 &
IM-7000 Series machines
just got less expensive.

Designed with clipped
corners and beveled
edges to fit your machine.

Manufactured from scratch
resistant quartz provides
you a low-cost solution to
replace your scratched or
damaged stage glass.
