

Module 5 - Lesson 10:

Find the area of a rectangle with fraction side lengths by relating the rectangle to a unit square.

CCSS Standard – 5.NF.B.5.b

FLUENCY (10-min)

Whiteboard Exchange: Subtract Decimals

Write and complete the equation. Show YOUR method.

$$1.4 - 0.5 = \underline{\hspace{2cm}}$$

$$0.9 - 0.27 = \underline{\hspace{2cm}}$$

$$\begin{array}{r} 0.14 \\ - 0.5 \\ \hline 0.9 \end{array}$$

$$\begin{array}{r} 0.90 \\ - 0.27 \\ \hline 0.63 \end{array}$$

FLUENCY (10-min)

Whiteboard Exchange: Subtract Decimals

Write and complete the equation. Show YOUR method.

$$7.5 - 2.28 = \underline{\hspace{2cm}}$$

$$4 - 1.36 = \underline{\hspace{2cm}}$$

$$8.23 - 2.75 = \underline{\hspace{2cm}}$$

$$\begin{array}{r} 34.00 \\ - 1.36 \\ \hline 2.64 \end{array}$$

FLUENCY (10-min)**Choral Response: Multiply Fractions**

What is the product?

Raise your hand when you know.

$$\frac{1}{3} \times \frac{1}{4} = \underline{\hspace{2cm}}$$

$$\frac{1}{3} \times \frac{3}{4} = \underline{\hspace{2cm}}$$

$$\frac{5}{7} \times \frac{1}{7} = \underline{\hspace{2cm}}$$

$$\frac{5}{7} \times \frac{4}{7} = \underline{\hspace{2cm}}$$

$$\frac{3}{6} \times \frac{3}{4} = \underline{\hspace{2cm}}$$

$$\frac{4}{6} \times \frac{6}{4} = \underline{\hspace{2cm}}$$

$$\frac{4}{5} \times \frac{7}{10} = \underline{\hspace{2cm}}$$

$$\frac{8}{5} \times \frac{8}{11} = \underline{\hspace{2cm}}$$

FLUENCY (10-min)

Choral Response: Add Whole Numbers and Fractions

What is the sum?

Raise your hand when you know.

$$1 + 1\frac{1}{3} = \underline{\hspace{2cm}}$$

$$3 + 2\frac{4}{6} = \underline{\hspace{2cm}}$$

$$1\frac{3}{4} + 2 = \underline{\hspace{2cm}}$$

$$2 + \frac{5}{5} = \underline{\hspace{2cm}}$$

$$2 + \frac{7}{5} = \underline{\hspace{2cm}}$$

$$6 + \frac{10}{10} = \underline{\hspace{2cm}}$$

$$4 + \frac{13}{10} = \underline{\hspace{2cm}}$$

$$\frac{8}{4} + 3 = \underline{\hspace{2cm}}$$

$$\frac{9}{4} + 1 = \underline{\hspace{2cm}}$$

LAUNCH (5-min)

Determine the area of a square that is part of a unit square.

1-MIN. - SILENT THINKING: Determine the area of the shaded region.

TURN & TALK:
How can you use what you know about the area of the shaded square to find the area of the shaded rectangle?

Did you draw lines in your mind to partition the unit square into smaller squares? If so, how many?

Do the partition lines help you determine the area of the shaded area?

LEARN (35-min)

Relate Rectangles with Unit-Fraction Side Lengths to a Unit Square

LEARN book page 77.

Find the area of the rectangle.

1.

What do you notice about this rectangle?

The side lengths are both fractions.

*The side lengths are both **less than 1 square unit**.*

We know that when the side lengths of a rectangle are both less than 1, the area of the rectangle is **less than 1 square unit**.

IMPORTANT:

Instead of thinking about how many square units it takes to cover the rectangle, we are thinking about how much OF the 1-unit square is covered by the rectangle.

Let's think about this rectangle as part of a unit square.

How many rectangles with side lengths of $\frac{1}{4}$ unit does it take to make 1 unit? **4**

How many rectangles with side lengths of $\frac{1}{2}$ unit does it take to make 1 unit? **2**

Did we create a UNIT SQUARE?

Yes. We drew a square that has side lengths of 1 unit.

What do you notice about the unit square now?

- It is portioned into 8 equal parts.*
- Each part is a rectangular tile with sides of $\frac{1}{2}$ unit and $\frac{1}{4}$ unit.*
- The unit square looks like it is tiled with rectangular tiles.*

Can we find the area of the shaded rectangle?

- Yes. The shaded rectangle has an area of $\frac{2}{16}$ or $\frac{1}{8}$.*

LEARN (35-min)

Relate Rectangles with Unit-Fraction Side Lengths to a Unit Square

Let's do a few more using this example:

How many rectangles with side lengths of $\frac{1}{4}$ unit does it take to make 1 unit? **4**

How many rectangles with side lengths of $\frac{2}{3}$ unit does it take to make 1 unit? **3**

Area of **1 rectangle** tile:

$\frac{1}{12}$ square unit

Area of **shaded rectangle**:

$2 \times \frac{1}{12} = \frac{2}{12}$ square units

$\frac{1}{6}$ square units

LEARN (35-min)

Relate Rectangles with Unit-Fraction Side Lengths to a Unit Square

LEARN book page 77.

Area of **1 rectangle** tile:

$\frac{1}{6}$ square unit

Area of **shaded rectangle**:

$2 \times \frac{1}{6} = \frac{2}{6}$ square units

$\frac{1}{3}$ square units

How many rectangles with side lengths of $\frac{1}{2}$ unit does it take to make 1 unit?

2

How many rectangles with side lengths of $\frac{2}{3}$ unit does it take to make 1 unit?

3

LEARN (35-min)

Relate Rectangles with Unit-Fraction Side Lengths to a Unit Square

LEARN book page 78.

How many rectangles with side lengths of $\frac{1}{5}$ unit does it take to make 1 unit? **5**

How many rectangles with side lengths of $\frac{3}{4}$ unit does it take to make 1 unit? **4**

Area of **1 rectangle** tile:

$\frac{1}{20}$ square unit

Area of **shaded rectangle**:

$3 \times \frac{1}{20} = \frac{3}{20}$ square units

LEARN (35-min)

Relate Rectangles with Unit-Fraction Side Lengths to a Unit Square

LEARN book page 78.

Area of **1 rectangle** tile:

$\frac{1}{30}$ square unit

Area of **shaded rectangle**:

$3 \times \frac{1}{30} = \frac{3}{30}$ square units

How many rectangles with side lengths of $\frac{1}{6}$ unit does it take to make 1 unit? **6**

How many rectangles with side lengths of $\frac{3}{5}$ unit does it take to make 1 unit? **5**

LEARN (35-min)

Review a student's work:

Did this student get the correct answer?

Area of 1 square tile: $\frac{1}{144}$ square unit

Area of shaded rectangle:

$$24 \times \frac{1}{144} \text{ square unit} = \frac{24}{144} \text{ square units}$$

LAND (10-min)

Exit Ticket

Name

Date

10

Find the area of a rectangle with side lengths of $\frac{1}{2}$ unit and $\frac{7}{8}$ units. Sketch to show how you know.
