

March 6th, 2017:

Galena Street East:

We are very grateful for your visit here at Shriners Hospitals for Children in Sacramento on March 4th, 2017. The patients and their families really enjoyed the dance performances and the songs! It truly brought out their smiles and energy; music is an amazing way to unite all our patients! Everyone was so well prepared and energetic! We loved that every song and dance was unique and encompassed so much that our patients were able to relate too. It has truly been one of their favorite group visits of all time! Everyone did a great job interacting with the children, and we hope it was a meaningful experience for you all also. Everyone always loves it when a group brings such enthusiasm and energy to their visit. We look forward to the group visit again.

We often hear from former patients, who share heart-warming stories and remember their experiences with Shriners Hospitals with great fondness. We appreciate the time and effort that the group put forth in making the afternoon special for our patients.

Thanks again for helping to make Shriners Hospitals for Children Northern California a very special place.

Sincerely,

Therapeutic Recreation/Child Life Department
