QUALIFICATIONS

Drum Point Property Owners Association Board of Directors Member

I have served over 6 years on the Board with several of them as President.

During that time I improved the operation of the Association by bringing on a professional Engineer to consult with the Board and oversee all significant road work.

I was instrumental in the development and adoption of a new Special Tax District that was more in line with the needs of the community.

I implemented procedures and process that helped the Association to be in compliance with State and Local law. This created an environment that helped the DPPOA Board of Directors be more open and transparent in its operation.

I saved the community thousands of dollars by using fiscally conservative spending practices.

I was instrumental in the implementation of zero based budgeting in DPPOA

THINGS I BRING TO DRUM POINT

I like to think that I maintain a calm, unbiased, objective approach to issues, with a ability to bring things to a resolution.

I will provide oversight to the operations of DPPOA that is polished by decades of experience as a Project Manager, Operations Manager, and Director of Operations.
