

Greenfield Genetics

21G GT
Woodside Farms Agassiz, BC

At Greenfield Genetics we are always thinking innovation. Our Research and Product Development Department accesses genetics and traits from all around the world combining only the best genetics that perform well on your farm. Numerous hybrids are tested every year across varying climate zones, this ensures your success and our success. Each research plot is tested for quality plus yield and/or overall whole plant digestibility against competitor checks resulting in accurate ratings for each hybrid, for floury kernel starch and milk per ton.

2018 Seed Guide

Grain / Dual Purpose Hybrids

Focus	CHU 2200 RM 76	Top yielding dual purpose hybrid Early Vigour, Solid agronomic package Superior silage potential for maturity		
Tucson	CHU 2200 RM 76	Early flowering, Rapid drydown Girthy cob, High test weight Excellent dual purpose hybrid		Conventional
Magnum	CHU 2200 RM 76	Superior hybrid for Northern regions Early flowering with excellent grain drydown Strong grain yield potential		
13B	CHU 2250 RM 77	Superior disease resistance and health package High grain yield, Flared husks, Rapid drydown Excellent standability, with strong stalks and roots		
Rustler	CHU 2250 RM 78	Strong emergence, Cool fall integrity Sturdy stalks, High grain yield hybrid Ideal for silage or high moisture grain		
HyTest	CHU 2250 RM 78	Floury Starch, High test weight Strong dual purpose plant with good roots Good agronomics with attractive white cob		
30-30	CHU 2300 RM 80	Superior plant health, Sturdy stalks Strong roots, Flared husks Exceptional grain potential for maturity		Conventional
14T	CHU 2300 RM 80	Dent hybrid with outstanding grain yield Strong stalks for fall integrity Excellent North and West hybrid movement Good choice as a grain or silage hybrid		
Caliber	CHU 2300 RM 81	Rock solid root and stalks Tall dual purpose hybrid Excellent plant health for silage or grazing		

17X	CHU 2350 RM 83	Tall hybrid with good standability High yielding silage and grain potential Dent starch type with fast drydown		Agrisure ^{GT} Agrisure ^{3000GT} & Conventional
Legacy	CHU 2400 RM 84	Delivers consistent yields on all soil types Sturdy stalks with excellent drought tolerance Excellent plant drydown, Strong grain yields		Agrisure ^{GT} Agrisure ^{3000GT} & Conventional
21G	CHU 2650 RM 86	Great standability with strong roots and stalks Tall plant, Excellent test weight Very strong disease tolerance package		Agrisure ^{GT}
Prime	CHU 2750 RM 90	Superior yield potential for its maturity Grithy fixed ears, Strong stalks and roots Floury starch, High test weight		Agrisure ^{GT/CB/LL} Agrisure ^{3000GT} & Conventional
Select	CHU 2800 RM 93	Strong emergence and plant health Delivers consistent yields, All soil rated Excellent drought tolerance		Agrisure ^{GT/CB/LL} Artesian
48-44	CHU 2900 RM 98	Excellent agronomic package Deep kernel set on girth cob Solid top grain yield potential		Agrisure Viptera 3111
44Z	CHU 3000 RM 101	Floury Starch rated, High test weight High yielding silage hybrid, Strong agronomics Tall robust plant, Superior grain to stover ratio		Agrisure ^{GT} Agrisure ^{3000GT} & Conventional
61-53	CHU 3250 RM 111	Tall hybrid, Strong dual purpose rating High test weight with good plant health All soil rated hybrid, Girthy fixed cob		Agrisure ^{3000GT}

Organic hybrid listing available online. Visit: www.greenfieldgenetics.com

Traits & Technology

Hybrids with the Agrisure® GT trait provide excellent tolerance to in-crop applications of glyphosate-based herbicides.

The Agrisure® GT/CB/LL trait stack provides season-long control or suppression of insects as well as herbicide flexibility with both glyphosate and glufosinate based herbicides.

Hybrids with the Agrisure® 3000GT trait stack offer control of corn borer and corn rootworm with tolerance to both glyphosate and glufosinate herbicides.

GT, BL traits offers tolerance to glyphosate and glufosinate herbicides and season long control of above ground lepidopteran insects

On each seed bag tag, growers will see four numbers. Each number has a meaning. How it works:

- Agrisure Artesian technology can be stacked with any of our best-in-class insect or herbicide traits, and will be designated by a capital "A" after the numerical identifiers.

- Artesian will not be spelled out in the suffix when a trait stack contains the Agrisure Viptera or Agrisure Duracade trait.

An on-seed application of a combination of Cruiser® 5FS insecticide (0.25mg a.i./seed of thiamethoxam) and Maxim® Quattro seed-applied fungicide, CruiserMaxx® Corn 250 insecticide/fungicide seed treatment protects corn seed and seedlings against early-season insects, and seed borne and soil borne diseases leading to increased plant stand, uniformity, vigour and yield potential.

For corn growers who want to improve their insect control spectrum, Fortenza® seed treatment provides critical early season control of European chafer, wireworm and cutworm. Coupled with the proven package of Maxim® Quattro, you get the added control of seed and soil-borne pathogens, such as Fusarium, Pythium, Rhizoctonia, and Aspergillus and Penicillium fungi.

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.
