Safety on a New Job Site 2

Project Updates 3

VOLUME 8, ISSUE 8

AUGUST 2015

## *55 Years and counting...*

*Established in 1960*

*From 1985-2008*

*Current Location 2008-2015*

*Starting out in a barn that use to stable circus animals is where it all began. Brothers, John & Hib Lindsey were partners and started the retail lumber yard and began building houses around the area. Hib eventually bought out Uncle John and dad entered into the commercial building trade. Kimball International was his first major customer. We also began working for the Naval Base at Crane & the State of Indiana in the late 70's to late 80's. Dad & I became business partners in the 80's, we also moved to our new location on Highway 145 and expanded our retail portion of the business. Hib eventually decided to retire in late 2007 but still continued to advise us if need be. Eventually, we decided to sell our retail end of the business and focus more on our General Construction trade. Thanks to Mr. Cook, the French Lick Springs Resort & the growth of our hometown we contributed to the new facelift of our community landscape. Dad began his building success with Mr. Habig, Kimball International. Sadly, we lost Hib while building our local bank also owned by the Habig Family. With a new location across the road we hopefully will continue on, make Hib proud and continue to build on the foundation he started.*

*Mark Lindsey*

## Safety on a New Job Site

It's important for you to remember that most accidents are caused by carelessness or thoughtlessness—yours, or someone else on the job. When an accident occurs, it is because someone has failed to foresee that it could happen. If you think ahead of the possible hazards likely to confront you, you can plan how to avoid them. When starting work at a new job site, size up the situation and think of ways to prevent accidents and keep the job safe.

Ask your supervisor to explain any phase of the job that you do not understand. If you are working with a new employee, be sure to explain the work to be done and be sure that he /she is qualified to do the work. This will allow you to work safely with this person and prevent accidents.

Power tools with frayed or broken insulation on wires should be taken out of service until repaired. When using ladders, make sure that they are in good shape with no broken or missing rungs. Wear hard hats and other personal protective equipment when called for on the site. When using scaffolding, make sure that it is properly set up with scaffold grade planks and good, stable footing. Do not work on scaffolding that is shaky or missing components.

Remember, a job is only as safe as each person makes it. If each employee will take nothing for granted, check all tools and equipment for safe operation, keep the job neat and follow company rules, they will be contributing to the safety of themselves and their fellow workers.

# Project Updates

### Toliver Building

We should start hanging drywall this week.

### Grigsby/Summit St.

Waiting for railing to come in for the roof on the screened in porch. Project should be completed soon.

### Southern Indiana Hardwoods

Should finish foundation walls this week just in time for the building to arrive.

### Pending Bids

Co-op, Harrison County

Sawmill, Mitchell

Multiple Bids, Dubois Wood Prod.

Furniture Store, Ramsey

Cabin in Martin County

### Recent Bids

We were notified that we will be awarded the Addition & Renovation to Superior Ag. at Huntingburg.

***Contract Signed!***

### This month in time...

**August 15, 1969** - Woodstock began in a field near Yasgur's Farm at Bethel, New York. The three-day concert featured 24 rock bands and drew a crowd of more than 300,000 young people. The event came to symbolize the counter-culture movement of the 1960's.

### Birthdays

7th - Zach

10th - Jon

27th - Mike Switzer
