

Tuckahoe State Park Features

- **2016 Adventure Camps and Family Activities:** Check out adventure camps, family activities and special events taking place in 2016 at Tuckahoe and Martinak State Parks.
- **Camping:** The park offers a family camping area with 54 sites, 33 with electric hookups, and a central bathhouse with showers and toilet facilities. Each site is equipped with a camping pad, picnic table and fire ring. No water hook-ups are available, but potable water is conveniently located around each loop. A dump station is available for trailer use. Pets are allowed in the campground, but must remain on a leash at all times.
- **Youth Group Camping:** The park also offers a youth group camping area with four sites, each site accommodating up to 30 people.
- **Cabins:** Six camper cabins are available for rent through the statewide reservation system. Four cabins sleep four and two sleep six; all equipped with ceiling fan, electricity, air conditioning, grill, fire ring and table.
- **Picnicking/Shelters:** The park has two picnic areas, each offering shaded sites with picnic tables, charcoal grills, playground equipment and horseshoe pits. The Lake and Cherry Lane Area Pavilions, with a capacity of 80 persons, can be rented through the statewide reservation system.
- **Arboretum:** The Adkins Arboretum encompasses 500 acres of park land and almost three miles of surfaced walkways leading through the tagged native species of trees and shrubs.
- **Fishing and Boating:** The park has a 60-acre lake with fishing and boating opportunities on 20 acres of open water. The remaining acres are flooded woodland. A launch ramp is available for boaters. Gasoline motor use is prohibited. Canoeing at Tuckahoe is a popular activity on both the lake and the creek because of the park's abundant wildlife. It is common for visitors to enjoy watching bald eagles, ospreys and great blue herons. Beavers and muskrats have surprised visitors by swimming past their canoes. Tuckahoe is full of pockets of secluded beauty, some only accessible by canoe. Canoes and kayaks can be rented for use on the lake above the dam for a daily fee (April- October). Check with park personnel for current fees for canoe rentals and park guided trips.
- **Multi-use Trails:** Tuckahoe State Park boasts excellent hiking, biking and equestrian opportunities. Trails that wander through the park include the Tuckahoe Valley Trail, a self-guided Natural Trail, the Physical Fitness Trail and the Lake Trail. If you are interested in helping support Tuckahoe trails through volunteering your time or making a tax deductible donation, inquire about our Trail Stewardship Program. The Maryland Park Service does not rent horses, and only provides the trails as a means of recreation.
- **Mountain Bike, Kayak, and Canoe Rentals:** Tuckahoe offers mountain bikes, kayaks, and canoes for rent at the park during the spring, summer and fall. Contact the park for current service charges, available days and times.
