

DEAR SHOOTERS, SPONSORS AND KO2M SPECTATORS

Just a quick note to help you coordinate your travel and your KO2M preparations. As you already know the Competition will be held at NRA Whittington Center and the setup day is June 28th and the competition June 29th to July 1st.

June 28th - SETUP DAY

Shooters and sponsors don't need to be at the range on setup day, but it might be convenient for them.

The Ko2M crew will be setting up the targets and once done, **we will post the LRF measured ranges to the targets the afternoon of June 28th in the Eagle Nest shack panel as we have done in previous edition.**

Due to safety reasons with the 2 Mile target location to be shot in the Finals day (July 1st) **the tents and canopy area will NOT be located in the firing line** but on the right side of the parking area. **A map will be posted in the Facebook page and on the Eagle Nest panel wall.** Please ask a Ko2M match director for clarification if needed.

The afternoon of June 28th (Setup Day) we will have somebody at the Eagle Nest office to help with the waivers, paperwork and weighting of rifles. **It is NOT compulsory to do these during setup day,** but if shooters do it will speed up the start of the shooting the first day and reduce their own stress.

June 29th - QUALIFYING DAY

REGISTRATION AND SHOOTERS MEETING

Sunrise is around 6:00 am

6.30 am we will open the Eagle Nest for waivers signing, paperwork and weighting of rifles.

7:30 am Compulsory Shooters meeting.

We will cover all the practical aspects of the 2018 KO2M and how the shooting order will be split for the two days of shooting.

Just after the meeting, there will be a random drawing with all the shooters registered to determine the shooter's positions. The shooter's positions will be posted in the Eagle Nest wall so they can make their preparations.

8:00 am - We will start shooting as close as we can to, but not sooner than 8:00 am

All shooters **should be ready to start shooting after the random draw** as they may be one of the first teams shooting. Anyone not present for their shooting slot will be pushed to the end of the day.

June 30th - QUALIFYING DAY

Sunrise is around 6:00 am

7:30 am Daily shooters safety briefing, compulsory for those teams shooting this day

7:40 am - Just after the briefing we will start shooting but NOT before 7:40 am

Just after all teams have shot and we process their performance, we will publish the Finalists list in the Eagle Nests wall. The order of shooting for finalists will be randomly selected at that time and posted immediately.

July 1st FINALS

Sunrise is around 6:00 am

7:30 am Daily shooters safety briefing, compulsory for those Finalist teams

7:40 am - Just after the briefing we will start shooting with finalist teams from the right side of the firing line on a steep angle to the mountain

IMPORTANT

On the finals day we have to enforce a strict safety sector that will preclude any shooter or equipment inside the line from the firing position (firing positions 97 - 100) to the poles and continuing to the road. That limitation will be clearly marked and guarded by a RO.

Just after all the Finalists have shot we will process their scores and have the awards ceremony in the Eagle Nests.
