**Farm Credit Canada Contributes \$1,500 toward new Lab Equipment**

**Yorkton** – “We are very pleased to be able to make this contribution and help The Health Foundation put this new lab equipment in place,” said Murray Gurski, the District Director for Farm Credit Canada. “This lab equipment will be used by thousands of people annually from east central Saskatchewan and western Manitoba.”

“I participated in The Health Foundations radiothon earlier in the year and I heard firsthand some of the medical staff explaining why this equipment is an important upgrade for the lab. We know our contribution will be used to buy equipment that will make a difference in our local healthcare, and that is important to us. Farm Credit likes to invest back into the communities where our customers and our employees live and work,” continued Mr. Gurski.

“We are very pleased to receive this donation from Farm Credit Canada,” said Ross Fisher, Executive Director of The Health Foundation. “Farm Credit has been very supportive of our work for many years and we are grateful for their continuing support.”
