

Net use instructions:

1. There are two courts. Only one is configured for *both* tennis and pickleball.
2. The “*Tennis Only*” court has the net set at regulation height. The strap is to prevent “whipping” and damage in windy conditions. The strap should remain hooked down at all times.
3. The Tennis/Pickleball court utilizes the strap to set the net at pickleball height (two inches lower than tennis height). To play tennis, unhook the strap and the net will return to regulation height. After completing your tennis match *please* hook the strap down to prevent damage to the net.

*Thank you for helping to keep our nets in good order and undamaged.
